

Graduate School Receives Grant

The University Graduate School has received a \$6,000 grant from the Woodrow Wilson Fellowship Foundation for the advancement of graduate education.

The award is part of the Foundation's \$1.8 million program of grants made this year to 81 graduate schools in this country and Canada. Funds are given to those schools where Woodrow

Wilson Fellows have elected to enroll for the 1965-66 year.

The University currently has three Woodrow Wilson Fellows enrolled. All are in their first year of graduate study. The Fellows and their fields of study are Kay Thornton Irwin, English; K. Carol Griffith McNair, English; and Kay Hemphill Michelfield, philosophy.

The grant given the Oregon Graduate School is to be used, in part, to aid students who have completed at least one year of graduate work. The remainder will be used to advance graduate education in a way to be determined by the school.

The Woodrow Wilson Fellowship Foundation, through its program of fellowships, recruits outstanding students to the profession of college teaching.

Panels Discuss Troubled Child

The "Troubled Child" will be the focus of a workshop at the University Thursday and Friday which will feature two well-known specialists in the field, George Donahue and Dr. Kent Durfee.

Donahue is currently establishing pilot programs for troubled children in selected communities under a government grant. He is assistant superintendent of schools in Elmont, N.Y., and the former supervisor of guidance for the New York State Education Department.

Dr. Durfee has conducted a private practice in adult and child psychiatry in Phoenix, Ariz., since July, 1964. He is a consultant to various high schools, a juvenile court, and Job Corps Center, and has held a post-residency Fellowship in child psychiatry from the Menninger Foundation.

Durfee's Thursday evening dinner address will concern the child in difficulty.

Sponsored by School Psychological Services of the School of Education, the workshop will be attended by persons in general education, special education, counseling, and mental health, and by social workers and psychologists.

Three panel discussions will be featured during the two-day workshop, moderated by Lee Brissey, professor of education.

"Dimensions of Trouble" will be the topic of a 1:30 p.m. panel discussion Thursday. The Friday morning discussion will be on "Plans, Programs, and Objectives." Educational practices and problems will be considered Friday afternoon by a classroom teacher, residential school teacher, and a psychologist.

Workshop registration fee is \$5.

Music Honorary Elects Officers

Three music faculty members have been elected officers of Phi Kappa Lambda, national music scholastic honorary.

H. Royce Saltzman, associate professor of music, is the new president of the local chapter; James A. Miller, assistant professor of music, vice president; and John Gustafson, associate professor of music education, secretary-treasurer.

Oregon Daily Emerald

The Oregon Daily Emerald is published five times in September and five days a week during the academic year, except during examination periods, by the Student Publications Board of the University of Oregon.

Second-class postage paid at Eugene, Oregon 97403. Subscription rates \$5 per year, \$2 per term.

Officials Will Explain Latin American Study

Students wishing to learn about the Fulbright-Hays Program and other study opportunities in Latin America are invited to come to the World Affairs Briefing Center in the Student Union at 4:30 p.m. today. Representatives of the U.S. Department of State and the Institute of International Education will be present to explain the program.

John Gange, director of the Institute of International Studies and Overseas Administration, is the chairman of the regional board of the National Screening Committee set up by the Institute of International Education of New York. Information on the program may also be obtained from him.

Friday Last Day To Drop Classes

Friday is the last day to drop courses, not Jan. 24 as was reported.

Soloist to Give Faculty Recital

A wide variety of vocal music will be presented in a University faculty recital at 8 p.m. Thursday in the School of Music auditorium.

James A. Miller, tenor, will perform works by Georg Philipp Telemann, Handel Yrjo Kilpinen, Reynaldo Hahn, and Charles Ives. He will be accompanied on the piano by his wife, Helen S. Miller.

Miller is an assistant professor of music who has presented numerous recitals throughout the Midwest and on the West Coast. Mrs. Miller has taught at the University of Missouri, William Carey College in Hattiesburg, Miss., and Goshen College.

The soloist will be assisted by Richard Thombly, flute; Robert Hladky, cello; and Victor Hill, harpsichord, during Telemann's "Cantata No. 7, for the Feast of the Purification of the Blessed Virgin Mary, for Tenor, Flute and

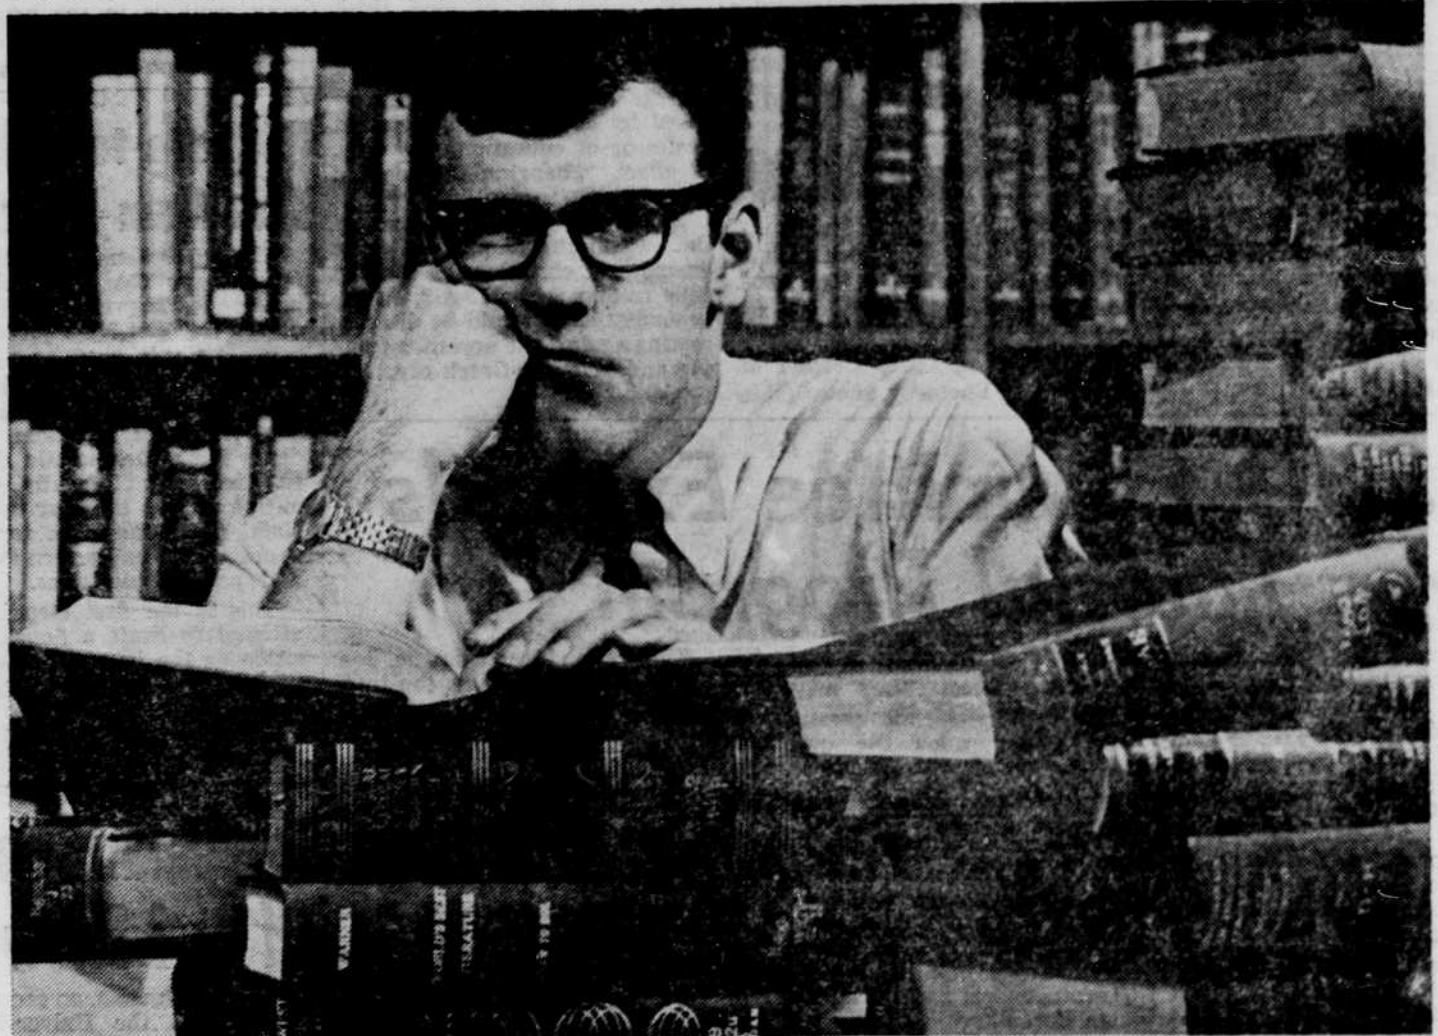

Continuo."

Trombley and Hladky are on the Music School faculty, and Hill is a graduate student in mathematics.

The recital is open to the public free of charge.

Is your required reading piling up?

Have you discovered you have time for little else but study... study... study

Cut your homework time

Your required reading assignments are probably taking too much of your time. You can cut this time in half because Reading Dynamics Institute can triple your reading speed in just a few weeks time. Not only will you read faster, but you'll remember what you've read.

Rapid readers have better concentration

In the very beginning when you learned to read, you were told to read aloud. Remember? You were taught to hear each word in order to understand it. Your reading speed was based on how quickly you could hear the words, not how quickly you could see them. Soon dull paragraphs found you daydreaming. YOUR READING WAS NOT KEEPING PACE WITH YOUR THINKING. Now, however, it is possible for you to read as fast as you can think. Now, at last, concentration becomes a nature-given fact.

What is Reading Dynamics?

It is the art of teaching people to triple their reading speed and at the same time increase their understanding of what they have read. Reading Dynamics is not new. Twenty years ago Evelyn Wood was working toward her M.A. She discovered that one of her professors could read at the rate of 6000 words per minute. She felt this unusual gift could be studied as a science and passed along to others.

In the years of study and research that followed, Reading Dynamics became perfected. The nation saw demonstrations of the Evelyn Wood speed reading on the Jack Paar, Garry Moore and Art Linkletter television shows. Time, Newsweek, Business Week and Esquire discussed the impact on those who had taken the Reading Dynamics course. Time Magazine reported, "Washington has seen nothing like it since the days when Teddy Roosevelt read three books a day and ran the country at the same time."
