

Visiting Rules...

(Continued from page 1)
University defined in rule A-3... (to protect the health and safety of persons in the University).

"However, in the area of organized groups there is a feeling and I want it understood that I'm not speaking of any one kind, that that group may, because of its recognized status at the University, interfere with some of the functions and responsibilities of the University by the type of activity they encourage."

Basye went on to say his draft was to "meet that narrow problem." He said the sanctions could only be imposed through section I-D, the "group sanctions" section.

"The thing that has bothered

me all along here," Basye said, "is the way our present rules on alcohol are constructed, it is an encouragement for the people to get off the campus to do the very thing that has ended up in the accident in the one case."

Basye said that, though there is no record that that sort of thing is going on to any extremes, "there should be some group sanction against encouraging that sort of group function from taking place."

Judi Crook to Vie In Beauty Contest

Judi Crook, sophomore sociology major at the University, was selected Friday night as Lane County's Miss Universe candidate.

Miss Crook will compete in the Oregon finals at Gleneden Beach March 31 to April 3. The state winner will go to Miami, Fla., for the Miss U.S.A. pageant, and the winner of that will compete for the Miss Universe title.

Rotary to Finance Foreign Studies In World Affairs

One academic year of graduate study abroad is available from the Rotary Foundation of Rotary International to young men who are interested in world affairs and who can fulfill a dual role of "ambassador of good will" and scholar.

Fellowships cover full transportation, educational, living and miscellaneous related expenses for one academic year, plus, in certain cases, a period of intensive language training in the study country prior to the commencement of the regular academic year.

An applicant must be male, unmarried, between the ages of 20 and 28, and have a bachelor's degree or the equivalent prior to the start of the 1967-68 academic year.

Application must be made through the Rotary club nearest to the applicant's permanent residence not later than March 15. The applicant must list five universities, not more than three in any one country, and all of which he must be willing and qualified to attend. Winners of awards will be announced in September, 1966.

DON McCANN
(M.E.) of the '60 Bethlehem "Loop" Course is a key man in the engineering department in our giant plant near Buffalo, N.Y. He's typical of young men on the move at Bethlehem Steel.

Seniors and graduate students in engineering and non-technical curricula will soon be interviewed for the 1966 Bethlehem Loop Course. We offer splendid career opportunities in steel plant operations, research, sales, mining, accounting, and other activities. For detailed information, pick up a copy of our booklet, "Careers with Bethlehem Steel and the Loop Course," at your Placement Office.

PSC Parking Experiment Flops

PORTLAND (AP) — Portland State College's experiment in easing the parking jam failed before it started. The college proposed running a bus through the Oregon City-Lake Oswego area for the 420 students living there. But only 15 said they would use the bus and the college dropped its plan. It said it needed a minimum of 50 passengers a day to make the bus feasible.

The college has a parking garage for 550 cars and plans an expansion to handle up to nearly 900 by next fall.

Oregon Daily Emerald

The Oregon Daily Emerald is published five times in September and five days a week during the academic year, except during examination periods, by the Student Publications Board of the University of Oregon.

Second-class postage paid at Eugene, Oregon 97403. Subscription rates \$5 per year, \$2 per term.

UNIVERSITY TRAVEL COMPANY

Cambridge 38, Mass.

General Electric is an easy place to work.

All you need is brains, imagination, drive and a fairly rugged constitution.

Oh, yes. Something else that will help you at G.E. is an understanding of the kind of world we live in, and the kind of world we will live in.

There's a lot happening: The population is continuing to explode. The strain on resources is becoming alarming. At a time when men are being lured by the mysteries of

space, we're faced with the task of making life on earth more livable.

There's a lot happening at G.E., too, as our people work in a hundred different areas to help solve the problems of a growing world: Supplying more (and cheaper) electricity with nuclear reactors. Controlling smog in our cities and

pollution in our streams. Providing better street lighting and faster transportation.

This is the most important work in the world today: Helping to shape the world of tomorrow. Do you want to help? Come to General Electric, where the young men are important men.

Progress Is Our Most Important Product
