

SU EdAc Budget Board...

(Continued from page 1)

It makes recommendations to President on the expenditure of about \$900,000 to \$1 million in student fees and SU income.

Programs Included

The programs in this budget include those of the Student Union Board, the ASUO, and student publications, as well as several others.

Monday the board looked at budgets for income from student fees, the forensics programs, administrative and operational expenses for the SU, several music programs, and the Women's Recreation Association. It made no decisions, which will be made at a later time, when all budgets have been presented.

Highlights of those budgets:

- Student fee income will go up about \$27,000 next year, based on \$6.50 per student per term with 13,000 students as a fall term enrollment base. That is slightly over the projected enrollment of 12,970.

- The forensics team apparently operated this year on a budget of \$8,990, all of which came from SU-EdAc.

Last spring the Budget Board cut the forensics budget from a request for nearly \$10,000 to that figure. It was indicated then that President Flemming would pick up the difference out of the general University budget. However, Scott Nobles, associate professor of speech, who runs the program, said Monday he cut out several trips in order to stay within that budget.

This year he is asking \$9,965, all but \$1,500 for forensics tournaments and other debate expenses.

ses. The \$1,500 will go into the symposium program under which students tour the state and discuss various topics in high schools and before civic groups.

- Primary changes in the administrative budget are in the salary area, because of an expected shake-up in the administration of the SU. The over-all budget for maintenance and repairs of the Student Union building is also up \$12,700 and foods expense is up about \$20,000.

- The School of Music has asked for a \$6,150 increase in its budget, from \$4,450 to \$10,600.

Part of that involves minor increases in existing programs but two new programs account for most of it. One is \$4,553 for a glee club, which would supplement chorus activity, according to Music School Dean Robert Trotter. The other is \$250 for students to tour the state as part of an opera workshop.

Also included in this budget is \$600 to have outstanding artists who perform on the campus remain for an extra day to talk

with music students. However, \$500 of that money is already in the budget, though it was used for another purpose last year.

Dean DuShane suggested that several of these programs might be cut out of SU-EdAc and handled under the general instructional budget.

- The Women's Recreation Association asked for \$2,730, a \$611 increase over last year.

Rich Publishes

The forest products industry must engage in marketing research in order to gain the data and the tools for sales forecasting and for long-range planning, according to an article by Stuart U. Rich which appears in the March issue of the Oregon Business Review.

The Review is published monthly by the University Bureau of Business and Economic Research. Rich is associate professor of marketing and director of the University's Forest Industries Management Center.

Schuyler...

demic criteria of achievement, the popularity of "filthy films" and contemporary poetry, and the use of "debris for sculpture, among others, were examples of Communist subversion.

At Root

"Whenever you run these evils down to their source, you will find a Communist or fellow-traveler at their root," he said.

Turning to the race problem, Schuyler said that Communists have had "definite instructions" in alienating the American Negro since 1928. He claimed that these instructions have included plans to destroy the National Association for the Advancement of Colored People (NAACP), the Urban Leagues, and Negro churches—"wherever the Negro intelligentsia are found."

He said that throughout the Thirties there were attempts to get states in the so-called "Black Belt" to secede from the Union. "Of course, the war in 1861-65 settled all that, but they tried, anyway. But by trying, the Communists alienated many Negro members in their ranks, because no Negro can stand the physical fact of segregation."

Need Local Help

Communists can never make any headway, he said, unless they have local people to help them. "Little people who do the work are at work in every village—even in this town," he said.

"Make no mistake about this: this is a worldwide network and it's dangerous to all of us because there are conscious agents all over the world—right up to and including the State Department and the White House."

Before discussing Karl Marx and his contributions to Communism, Schuyler noted the role of labor unions in the conspiracy, and gave specific details concerning Soviet agents who have been detected and subsequently dealt with.

Techniques Polished

Then, he noted that "this conspiracy started well over a century ago, with Marx, but they've only polished their techniques since 1917."

Schuyler said that "the father of Socialism started out as anti-

Communist—in those days the words Communist and Socialist were correctly and commonly interchanged."

However, "Marx had no convictions that would not change in a crisis," and Schuyler described how Marx came to change his convictions.

"Marx himself," Schuyler said, "started the first international Communist conspiracy through his European travels."

A question and answer period followed the lecture.

YOU CAN EARN UP TO 14 HOURS OF COLLEGE CREDIT WHILE

STUDYING THIS SUMMER

IN THE NATION'S CAPITAL AT THE GEORGE WASHINGTON UNIVERSITY

A program designed to make the unparalleled resources of Washington, D.C. available to students in other colleges and universities.

JUNE 13-JULY 20
JULY 21-AUGUST 26

- Special 3-week workshops in Education begin June 13, July 5, and July 25

- Air-conditioned classrooms, library and residence hall

- Urban campus just four blocks from the White House

The Radical Right...

(Continued from page 1)

Schechter.

"Criticism is the life-blood of society, but it has to be responsible," Schechter continued.

In describing the extremist movement, he defined an extremist as "a person who starts from the position that he is one hundred per cent correct, and you are wrong."

The hallmark of a right-wing extremist is that he is patriotic, loyal, god-fearing, constitutional, and for free enterprise. If you disagree with him, you are not those things; you are an atheistic communist."

One tool of the radical right, according to Schechter, is that of

repetition. "If you repeat a charge as often as possible, people will think it must be true."

Another extremist device is the "eleventh hour approach" he said. In this, he said, the populace is told that the country is 80 per cent communist, but there is time to fight back. But, said Schechter, "I submit to you that they can't tell the difference between a communist and a republican."

Oregon Daily Emerald

The Oregon Daily Emerald is published five times in September and five days a week during the academic year, except during examination periods, by the Student Publications Board of the University of Oregon. Second-class postage paid at Eugene, Oregon 97403. Subscription rates \$5 per year, \$2 per term.

ROOMMATES REVISITED

This morning's mail brought a letter from a student at a prominent Western university (Princeton). "Dear Sir," he writes. "In a recent column you said it was possible to get along with your roommate if you try hard enough. Well, I'd like to see anyone get along with my roommate! Mervis Trunz (for that is his name) practices the ocarina all night long, keeps an alligator, wears knee-cymbals, and collects airplane tires. I have tried everything I can with Mervis Trunz, but nothing works. I am desperate. (signed) Desperate."

Have you, dear Desperate, really tried everything? Have you, for example, tried a measure so simple, so obvious, that it is easy to overlook? I mean, of course, have you offered to share your Personna® Super Stainless Steel Blades with Mervis Trunz?

To have a friend, dear Desperate, you must be a friend. And what could be more friendly than sharing the bounty of Personna Super Stainless Steel Blades? Who, upon enjoying the luxury of Personna, the nickless, scrapeless, tugless, hackless, scratchless, matchless comfort of Personna, the ease and breeze, the power and glory, the truth and beauty of Personna—who, I say, after such jollies could harden his heart against his neighbor? Nobody, that's who—not even Mervis Trunz—especially not today with the new Personna Super Blade bringing us new highs in speed, comfort, and durability. And here is still a further bonus: Personna is available both in Double Edge style and Injector style.

No, dear Desperate, your problem with Mervis Trunz is far from insoluble. In fact, as roommate problems go, it is pretty small potatoes. Compare it, for example, to the classic case of Basil Metabolism and E. Pluribus Ewbank.

Basil and E. Pluribus, roommates at a prominent Eastern university (Oregon) were at an impassable impasse. Basil could study only late at night, and E. Pluribus could not stay awake past nine p.m. If Basil kept the lights on, the room was too bright for E. Pluribus to sleep. If E. Pluribus turned the lights off, the room was too dark for Basil to study. What to do?

Well sir, these two intelligent American kids found an answer. They got a miner's cap for Basil! Thus, he had enough light to study by, and still the room was dark enough for E. Pluribus to sleep.

It must be admitted, however, that this ingenious solution had some unexpected sequelae. Basil got so enchanted with his miner's cap that he switched his major from 18th Century poetry to mining and metallurgy. Shortly after graduation he had what appeared to be a great stroke of luck: while out prospecting, he discovered what is without question the world's largest feldspar mine. This might have made Basil very rich except that nobody, alas, has yet discovered a use for feldspar. Today Basil, a broken man, squeezes out a meagre living as a stalagmite in Ausable Chasm.

Nor has E. Pluribus fared conspicuously better. Once Basil got the miner's cap, E. Pluribus was able to catch up on his long-lost sleep. He woke after nine days, refreshed and vigorous—more vigorous, alas, than he realized. It was the afternoon of the Dean's tea. E. Pluribus stood in line with his classmates, waiting to shake the Dean's hand. At last his turn came, and E. Pluribus, full of strength and health, gave the Dean a firm handshake—so firm, indeed, that all five of the Dean's knuckles were permanently fused.

The Dean sued for a million dollars and, of course, won. Today E. Pluribus, a broken man, is paying off his debt by walking the Dean's cat every afternoon for ten cents an hour.
