

Buchanan, Frye Stand Firm

Annette Buchanan is standing firm.
But so is William Frye.

Frye, the Lane County district attorney, wants Miss Buchanan, managing editor of the Emerald, to reveal the names of students who told her they use marijuana.

She will appear in court next Monday to find out if she will be cited for contempt for refusing to reveal those names to a Grand Jury in spite of a court order directing her to tell.

She says she will not tell because it would violate journalistic codes of ethics. "I just could not live with myself if I revealed their names," she says.

When she interviewed the seven students (five of whom she remembers the names of) she told them she would keep their names confidential. In the story which she wrote from the interview she used pseudonyms for the seven.

But on Wednesday, June 1—eight days after the story appeared in the Emerald under the headline "Students Condone Marijuana Use"—Frye subpoenaed Miss Buchanan, Emerald Editor Phil Semas, former editor

Chuck Beggs, and former managing editor Bob Carl, to appear before the Lane County Grand Jury.

The same day Frye issued the subpoenas, June 1, he issued a press release on the investigation.

Larry Hildebrand, assistant city editor of the Portland Oregonian, said Frye's press release was delivered to his paper by a messenger at about 9 p.m. Wednesday.

He said the Oregonian had received a tip on the story from a University student earlier in the evening and a reporter had talked to Miss Buchanan before the release arrived.

Hildebrand added that the release, accompanied by a picture of Frye holding the Emerald issue in question, arrived before the Oregonian was able to contact Frye.

Henny Willis, a reporter for the Eugene Register-Guard, said Frye called him Wednesday night to tell him that he had sent a release to the Oregonian and that a copy of the release would be available in Frye's office the next morning.

Willis said it was the first time Frye had ever issued a release to him before a case went to court.

The press release said that the story gave the impression "drug use is out of hand on the campus," while it actually is not, according to Frye.

"This investigation," he continued, "is as much to allay the concern of the public as to learn what we can about the sources of the drug on this campus and the extent of its use."

Arthur Johnson, Miss Buchanan's attorney, later objected to the release and the intent of those statements in particular.

Although the release said the four students were to be questioned about Miss Buchanan's story, all four said that the police officer who served the subpoenas did not tell them what they were going to be asked about.

By the time the release reached the Oregonian three of the students—Miss Buchanan, Semas, and Beggs—had been served. Carl was not served until the next morning after the story had appeared in the Oregonian.

When the four appeared before the Grand Jury on June 3, the jurors and Frye decided that the other

For Three Years

Faculty OK's Pass-Fail PE

Pass-or-fail physical education courses were approved for a trial period of three years at the June 1 meeting of the University faculty.

Under the plan submitted by the Faculty Curriculum Committee, students will have the option of taking physical education service courses, those numbered 180, 190, 380, and 390, on a no-grade basis for University credit.

During the experimental period the Bureau of Educational Research will co-operate with the School of Health, Physical Education, and Recreation to carry out a study of effects of grades, as opposed to no grades, on enrollment.

The plan is designed to increase enrollment in PE courses. However, PE majors will not be allowed to elect the no-grade option.

In other business, Robert Campbell, head of the economics department and chairman of the ad hoc committee for evaluation of teaching, submitted a report urging the faculty to participate in a "trial run" of the course evaluation program.

The Faculty Advisory Council moved the adoption of the report and the motion was passed. The results of the "trial run" will not be used in the regular evaluation of faculty members, according to University President Arthur S. Flemming.

"It will not be used as evidence in connection with promotion and tenure cases. The ASUO will determine what use it desires to make of the results," Flemming said.

A motion submitted by Jack Wilkinson, professor of art, concerning the routing of reports from the Student-Faculty Council to the Faculty Senate, was postponed until the October faculty meeting.

The faculty tabled, by voice

vote, a motion concerning student eligibility rules, proposed by W. P. Rhoda, professor of physical education and chairman of the Student Activities Committee.

A motion calling for the major of all degree recipients to be recorded on all records was approved.

David Aberle, professor of anthropology, gave notice of a motion that the University not co-operate with the United States Selective Service in furnishing information on how students subject to the draft are doing in school.

Specifically, the motion would:

- Discontinue the practice of supplying gpa's.
- Continue the practice of not listing students in rank order.
- Cease supplying information concerning how students are doing in their studies.
- Refrain from using University personnel for Selective Service tests.
- Cease indicating whether students are full or part-time.

The motion will be voted on at the next meeting of the faculty, scheduled for October.

Stadium Plans, Name Win Board Approval

By PHIL SEMAS
Emerald Editor

KLAMATH FALLS (Special)—The University's proposed football stadium now has a name, a financing plan that includes a new fund drive, and a state-approved architects' plan.

The stadium will be called Autzen Stadium. The State Board of Higher Education agreed last week to name it after the Autzen Foundation, which contributed \$250,000 to the \$2,332,500 project.

Besides the Autzen gift, the University has presently received \$995,000 in gifts plus another \$80,000 in gifts of materials and manpower for a total in gifts of \$1,330,000. The Athletic Department will contribute \$925,000 from its reserves.

At present it is planned, if necessary, to use \$55,000 from a reserve for dormitory equipment depreciation to make up the balance. That money would be paid back into the fund by the University later.

New Campaign

But University President Arthur S. Flemming told the Board of Higher Education that the University will inaugurate a campaign for additional smaller

pledges to raise another \$200,000.

Flemming said that if this drive is successful the loan from the dormitory reserve will not have to be made and less will have to be taken from the Athletic Department reserves.

He said he expected the drive to succeed, noting that the first drive, which raised well over \$1 million, included only gifts of \$1,000 or more.

He said this new drive would be for smaller sums and would be aimed at University alumni and the Eugene area.

The State Board also approved preliminary plans by Skidmore, Owings, and Merrill (SOM), a Portland architectural firm, for the stadium and authorized a bid call for mid-July for \$350,000 of excavation and grading work to be done this summer.

Separate Contract

The actual work on the stadium will be let under a separate contract and will not be let until next summer. The stadium is scheduled for completion by fall of 1967.

The stadium will be built of concrete and earth in a large bowl made from materials on the site. Architect Tom Frey of SOM

said this was the only kind of construction possible within the budget planned.

Tom Edwards, assistant state highway engineer, told the State Board that the stadium will not create any difficult access problems, assuming Lane County goes ahead with plans to widen a section of Centennial Blvd. near the North Bank to four lanes.

No Track

Frey and Flemming both spent considerable time explaining the disadvantages of putting a track on the North Bank.

Flemming said present plans are to put an "all-weather" rubber asphalt track on the Hayward Field site instead of the present cinder track, take out the present intramural track, and tear down one side of the Hayward Field stands.

He said the additional area gained from tearing down part of the stands and getting rid of one track would be used for recreational purposes. The all-weather track would be able to meet all needs of intramurals, physical education classes, team practices, and meets, according to Flemming.

The president said this plan was preferable to putting a track in the stadium.

Building Problems

Frey added that a track would also cause building problems, since the stadium would have to be expanded, cutting out much-needed parking space.

Flemming said the stadium would probably be used by more than just the University. He said Eugene public schools especially might be interested.

Flemming called the stadium question "a very important point in our history."

He said it would enable the University to continue a top-quality intercollegiate athletic program. And he said the fund drive for the stadium built up "considerable interest in the private sector" which could be made use of for other projects, if this one is carried through successfully.

He called the North Bank site "the best possible location" for

The Emerald Needs Help

Students who are interested in working on the Summer Emerald may contact Managing Editor Annette Buchanan in 301 Allen Hall, ext. 1817, or at 343-3706.

Reporters, desk editors, proofreaders, and photographers are needed. Pay is exceptionally good and consists entirely of personal satisfaction.

SCORCHING JUNE WEATHER makes the Student Union Terrace a popular place as students return to campus to begin their summer session studies.
