

Students Sanctioned In Court Decisions

By KATIE KARLSON
Of the Emerald

A University freshman was found guilty and sanctioned with an admonition warning in Student Court Wednesday night.

Three other freshmen were given a 12 hour work sanction with automatic suspension if not completed for violation of non-completion of a previous work sanction.

In the first case a student was charged with unauthorized use of parking sticker on an automobile.

During registration last fall term the student said he did not receive a parking sticker. Instead he used one he picked up out of a trash can in the registration area.

This was not the type of sticker he was to use, being a dorm resident. Police found that the sticker on his car was one of four unaccounted for after registration.

The second case concerned the breaking of a sanction which in turn meant breaking disciplinary probation. The students didn't know at the time this

could lead to expulsion from the University.

The third case was appealed to student court from minor court. Originally two students were sent to minor court for the same charges, resulting from disorderly conduct during Dead Week.

One took his sanction of disciplinary probation until the end of winter term and four hours of work at the physical plant.

The other student appealed and was given the same sanction as the previous student. The charge of both was disorderly conduct on the evening of Dec. 7, while 24 quiet hours were being enforced in their dorms.

The defense upheld that the student was not any more involved than any of the others in the noise and heated arguments which caused the counselors to send him to court. The counselors imposed their own sanctions on the other members of the group.

In the prosecution, it was stated that the counselors had been trying to talk to the students, which resulted in a heated argument. The counselors left the scene to avoid a fight breaking out.

The argument lasted about 15 minutes, but did disturb those studying at the far end of the first floor hall.

Groundskeeper Attacks Table

The SDS table on the EMU terrace was reportedly attacked by a member of the Physical Plant personnel Wednesday morning.

According to William Kerlee who was manning the table, a Physical Plant groundskeeper Don Clark, came up to the table and stated, "I don't like this table and I don't like the signs."

He then started to tear down signs and posters at the table, said Kerlee.

When asked to apologize and pay for the damage, Clark refused and put a poster into his groundskeeper's bag.

Following the incident, Kerlee protested to Physical Plant director Irwin Wright who stated, "I'm afraid if it had been me, I would have done the same thing." Wright did say he would look into the issue, though.

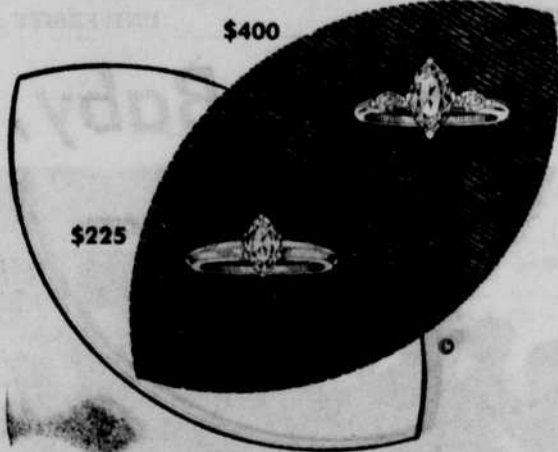

Later in the day, Bill Watson, head of SDS, received a letter of apology about the incident from J.O. Lindstrom, Director of Fiscal Affairs.

The Physical Plant is under the jurisdiction of Lindstrom who stated in the apology, "Such conduct at the University of Oregon is contrary to University policy, and I would like to express apologies to you."

Jewish Comedy Scheduled Film

"Sallah," a satiric film comedy about modern Israel, will be shown Sunday, Jan. 14, at 8 p.m. at Temple Beth Israel, 2500 Portland Street.

The movie presented as the second program in the Festival of Jewish Arts and Culture series introduces Haym Topf in the title role. This particular role has been termed a classic characterization in the tradition of Chaplin, Fernandel and Cantinflas.

Sallah, warm of heart, shrewd of head and rascally to the core, comes out on top of a wonderfully idealistic, red-taped system and provides the human delight to the comedy.

Admission is by series ticket or single admission of \$1.50.

Picture yourself on every page of MODERN BRIDE

Gowns... gowns... gowns! Dreamy Spring creations in gorgeous color, photographed in the volatile mood of Italy's Venice and a quartet of romantic towns. Picture yourself—page after page—lovely in lace and ivory linen. In organza and silk satin. Pique, chiffon and peau de soie. Then hum through a thoughtful guide to choosing just the right music for your wedding. Dream over the picture-splashed feature on hideaway honeymoons in Hawaii, Puerto Rico and the Poconos. The new February/March Modern Bride also gives you neat 'n easy decorating tips...gift suggestions...cooking pointers...beauty hints...appliances and table settings...plus where to find all the whatever's you need for your wedding and after. For your special day, the special magazine... Modern Bride. On your newsstand now.

For the 5% of the people who want to read faster, with full comprehension and better retention...

2055 Patterson St.

- Increase your reading speed from 3 to 10 times!
- Learn to comprehend more—retain more of what you read.

OUR AVERAGE STUDENT READS 4.7 TIMES FASTER THAN HIS STARTING SPEED

HOW THE EVELYN WOOD METHOD DIFFERS FROM ALL OTHER COURSES.

No machines are used. You learn, instead, to use your hand as a pacer...a "tool" you always have with you.

Conventional rapid reading courses aspire to 450-600 words a minute. Most Reading Dynamics graduates can read between 1,500 and 3,000 words per minute...and many go even higher.

EVELYN WOOD'S STARTLING DISCOVERY AND HOW IT CAN TRIPLE YOUR READING SPEED.

Eighteen years ago, Mrs. Wood made a startling discovery that led to the founding of Reading Dynamics. While working toward her masters degree, she handed a term paper to a professor and watched him read the 80 pages at 6,000 words per minute—with outstanding recall and comprehension.

Determined to find the secret behind such rapid reading, she spent the next two years tracking down 50 people who could read from 1,500 to 6,000 words per minute. She studied their techniques, taught herself to read at these faster rates. Now, after years of testing, you can benefit from this great discovery.

READ WHAT FAMOUS PEOPLE HAVE TO SAY ABOUT THEIR OWN EXPERIENCE WITH READING DYNAMICS

Results have been reported in Time, Newsweek, Business Week and Esquire. Demonstrators have appeared on television with Jack Paar, Gary Moore and Art Linkletter.

Describing Reading Dynamics' impact on some of our nation's legislators, Time said, "Washington has seen nothing like it since the days when Teddy Roosevelt read three books a day and ran the country at the same time."

Senator Herman E. Talmadge, Georgia: "In my opinion, if these reading techniques were instituted in the public and private schools of our country, it would be the greatest single step we could take in educational progress."

Senator Proxmire, Wisconsin: "I must say that this is one of the most useful education experiences I have ever had. It certainly compares favorably with the experiences I've had at Yale and Harvard."

Senator Symington, Missouri: "I can read most material at speeds above 3000 W.P.M. and technical material in the 2000 W.P.M. range."

Ben H. Willingham, President of Genesco: "I feel reasonably confident that almost any company that would encourage its executive group to put forth the time and effort necessary to apply this improvement in reading skill would find the results quite worthwhile."

A Reading Dynamics class at St. Louis University had an average beginning speed of 357 words per minute, an ending speed of 1,810 words per minute. Average comprehension rose from 73% to 83%.

No wonder this course is backed by such an amazing guarantee.

We guarantee to increase the reading efficiency of each student AT LEAST 3 times with good comprehension. We will refund the entire tuition to any student who, after completing minimum class and study requirements, does not at least triple his reading efficiency as measured by our beginning and ending tests.
