

THE SUN SHOP CAN SAVE YOU MONEY ON THE WORLD'S FINEST STEREO SYSTEMS.

The Sun Shop can save you money on the world's finest stereo systems. Here is an example:

The amazing Marantz 2220 AM/FM Stereo Receiver, with a guaranteed 20 watts per channel RMS over the entire audible range. For speakers we have chosen the Marantz 6 G's. They are full range speakers, with a very flat response curve have very little distortion. And as an extra bonus, they are so efficient that in effect they double the power of your receiver when compared to most other speakers relative low efficiency levels. The new Dual 1214 with a Shure M-55E elliptical cartridge is our choice for a record changer in this system. It combines features like a low-mass tubular tone arm, low friction pivot bearings, 6% pitch control, damped cue-control, pre-set anti-skating with the traditional Dual quality.

Marantz, Dual and Shure—quite a system, and you can save around \$90.00 on this system at the place for Marantz, Dual and other fine stereo systems, the Sun Shop on Campus.
