

Woman tunes in to outer space

By JACKMAN WILSON
Of the Emerald

Aleuti Francesca of the Solar Light Retreat in Central Point, Oregon, says she has been in contact with extraterrestrial intelligences since 1958.

Every week or so she receives "tele-thought transmission." These messages "come in the form of thoughts that cloak themselves in words," she says.

Francesca says that she and probably thousands of others simply sit down, make themselves receptive and tune in. "There's an actual technology involved in the transmissions," she says, referring to beaming mechanisms on other planets.

"It's so natural to me that I can't describe it as something strange or unusual."

One would expect to learn a great deal from beings on other planets, and Francesca claims she has. Twelve years ago, she says, her extraterrestrial contacts informed her of increasing volcanic activity in the Cascades. A few years later a great social and moral upheaval was predicted. These prophecies, among others, have proved to be true, Francesca says.

Francesca says we can expect major geological changes in the coming years and a UFO landing by the year 2000.

The extraterrestrials (not aliens; "I don't consider them alien") are interested in our planet because "we're on the verge of destroying ourselves if someone doesn't stop us." Francesca says the extraterrestrials will not allow that to happen.

"The space people's purpose in coming to this planet is basically to re-educate us," Francesca says. Re-education is needed because the geological, social and psychological changes are accelerating, leading to a "spiritual revolution" which will probably occur in our lifetimes, Francesca says.

The spiritual revolution will result in the collapse of governments as we know them, Francesca says. Spiritual leadership will replace economic leadership and a golden age of brotherhood, equality and creativity will dawn.

The change would be catastrophic, unless "enough people changed or rapidly raised their consciousness and stabilized the situation," Francesca says. However, "nothing new is built upon the rotting remains of an old structure."

Francesca describes the extraterrestrials through analogy and comparison. "Space people cooperate, Earth people compete," Francesca says, quoting an

aphorism delivered through a tele-thought transmission.

The extraterrestrials inhabit other planets in our solar system, Francesca says, but they are invisible to our eyes. "Think of an electric fan," she says. "When the blades speed up they become invisible. The space people vibrate at a different frequency band."

Francesca also offers workshops for people interested in learning more about "why there are areas in your life you're not happy with and what you can do to change them."

But most interesting of all is a technique Francesca developed called "regression through reverie." This process involves learning about your problems through analysis of your past lifetimes.

Francesca herself is consciously aware of more than a half dozen previous lifetimes. Her clearest recollection is of her life as a gypsy in Spain during the Spanish Inquisition. "Gypsies

were persecuted at that time," she says. "We got chucked in a dungeon and it was a pretty messy ending. It's affected my life in many ways."

Francesca says that "many talents or inclinations you have now tie in with what you were before." Many phobias and fixations are also explained through experiences and past lifetimes. Her experience as a gypsy, Francesca says, gave her a childhood revulsion for nuns.

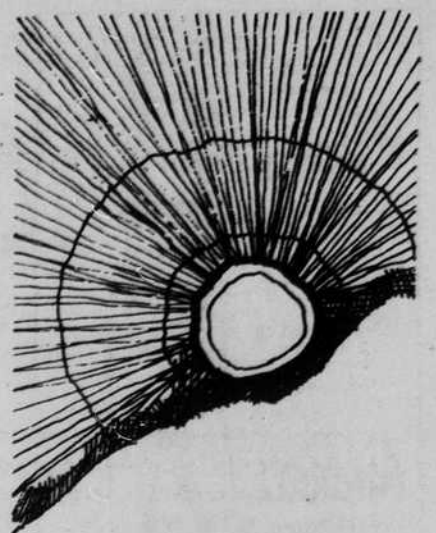

Francesca can also remember lifetimes in China, Rome, Egypt and a very old lifetime, just after the sinking of the continent of Lemuria. Francesca says she can get 80 or 85 per cent of the people she treats to regress to previous lifetimes.

People interested in the workshops or in personal counseling may contact Francesca this week at 344-5633.

Finally, if you see a flying saucer land, you should keep from panicking and "see if the emanations are good." If they are, you have nothing to fear, but you should "be careful of the magnetic force field."

Actually, Francesca didn't come to Eugene to talk about space people. She came to give lectures on what she calls "spiritual-psychological learning," that is, "learning how to change your life through changing your consciousness."

On Tuesday night Francesca lectured on "Preparation for Personal and Planetary Change." Friday at 7:30 p.m. she will talk on "Transmutation of Consciousness" in the EMU Forum Room. Friday's lecture costs \$2.

Supreme Court declines review of KISN denial

WASHINGTON (AP)—The U.S. Supreme Court declined Monday to review a Federal Communications Commission (FCC) decision denying license renewal to KISN of Vancouver, Wash., and two other stations.

The stations all are owned by Star Stations Inc. of Omaha, Neb. The Supreme Court action means the FCC decision stands, and the stations have 30 days to continue operations before an interim operator is named.

License renewals were denied in February 1975 based on allegations that KISN slanted its news coverage of the Oregon senatorial campaign in 1966 and that WIFE slanted its news coverage of the Indiana senatorial campaign in 1964.

A taste of Carlo Rossi Chablis is like kissing someone you love

Salute:

I am Carlo Rossi. Yes, I am a real person. There is something special about Carlo Rossi California Chablis you should know. The grapes used are like people you care a lot about. They can cause you a lot of trouble -- believe me, there are many varieties that are much easier to grow than those in the Carlo Rossi wines -- but then comes that moment when it's all worth it.

For me, that time is tasting the wine. The Chablis is so clean and pure, right away you get the aroma of those grapes in the glass, a promise of what is to come. Then when you taste it . . . it's like a kiss from someone you love.

Carlo Rossi Chablis is made for you to enjoy as much as I do. Try it, and let me know -- if you're willing to kiss and tell.

Ciao,

Carlo Rossi
