Linguistic lecture on tap

David Perlmutter, associate professor of linguistics at the Massachusetts Institute of Technology, will present a lecture, "Topics in Relational Grammar," at the linguistics department colloquium Friday at 2 p.m. in 231 Gilbert Hall.

Perlmutter, a well-known researcher in theory, is the author of "Deep" and "Surface Structure

Constraints in Syntax" and, with Paul Postal, "Relational Grammar." This latter work represents a significant alternative to standard transformational grammar and is based on the assumption that universal grammatical relations are instrumental in explaining various syntactic phenomena.
