

Buy a power-packed JVC receiver with a great-sounding pair of **BOSE** speakers and get a famous Philips turntable

Absolutely Free

We proudly offer this music system as quite possibly the best performance/cost value ever offered by any dealer. The power-packed JVC S-100 MKII receiver with the realism of sound that only BOSE

speakers can deliver, combined with the precision engineering of the PHILIPS GA-437 turntable makes a winning combination . . . all at a price you are unlikely to see again!

BOSE \$220.00
JVC \$229.95
Philips FREE
EMPIRE \$50.00
 Now Only **\$499.95**

\$499⁹⁵

1. The Receivers

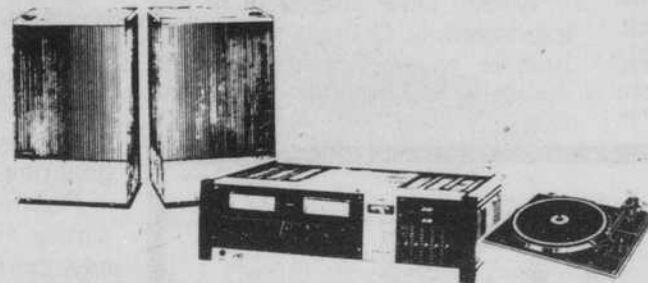

In business since Lindberg crossed the Atlantic, JVC has been building their receivers with only one thing in mind — you — the listener. JVC builds in what the others seem to leave out. We think you'll appreciate their dedicated quality and the features like the built-in graphic equalizer, and phase locked loop FM tuning.

2. The Speakers

In 1968 BOSE introduced the first Direct/Reflecting* speakers to the world of music. The widely acclaimed Direct/Reflecting* principle is based on the fact that music in a real concert is mostly reflected sound and only 10% direct sound. The entire family of BOSE speakers offer the Direct* design to achieve concert hall realism at home.

3. The Turntables

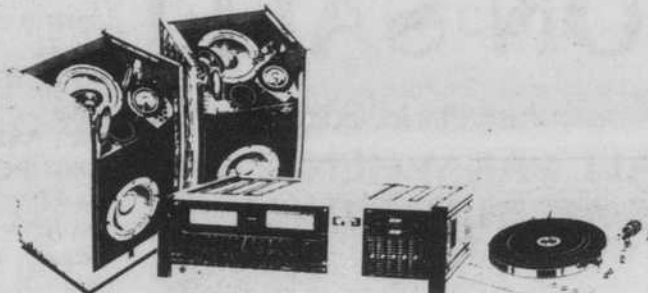

PHILIPS has long been the acknowledged leader in turntable design. PHILIPS combines fine European craftsmanship with silent belt-driven motors. The results: higher quality and superlative performance. We think you will appreciate the extra attention to detail and quality. Your BOSE speakers and JVC receiver certainly will.

For those with larger livingrooms, real performance can be achieved with the BOSE-JVC-PHILIPS combination without spending an arm and a leg.
