THE ANANDA MARGA SOCIETY PRESENTS

DARK STAR

Since its release in 1974, this film has gathered a sizable "underground" following which acclaims it as one of the best science-fiction films ever made. The crew of the scout-ship DARK STAR have been cruising around in space for 20 years looking for "unstable" planets to destroy. But the DARK STAR's crew find themselves getting "spaced out" by the immensity of the Universe — and they get more childlike and goofy as the film races to a great climax.
