sound as clear as light

ESS

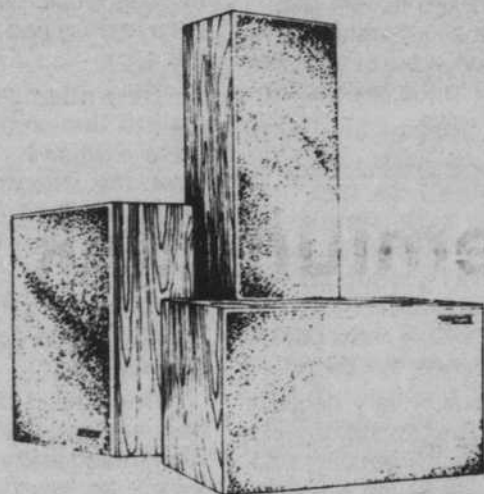

Heil air-motion transformer

Progress is everything. And in high fidelity progress is precision sound reproduction. Now the ESS AMT-1B takes you one step closer to ultimate sound reproduction.

One of the new second generation of Heil air-motion transformer loudspeaker systems, the AMT-1B, utilizes the latest advances in Heil technology for performance unparalleled by any conventional speaker. The 1B is equipped with a newly-refined version of the world famous Heil air-motion transformer midrange/high frequency system that turned sound reproduction around.

The precision of the Heil is stunningly complicated by a sophisticated twelve-inch woofer of advanced bextrene polystyrene linked to a rear-mounted passive radiator for incredibly detailed bass below 35 Hertz. These perfectly matched transducers produce rich, full, clear sound reproduction over the entire audio spectrum. Don't settle for the commonplace; settle for the speaker of the future - now, and at unheard of low prices. ESS... Sale..., it's as clear as light, and it's all happening at Napier Audio... NOW!

"It was as close to a Studio performance as I could get"

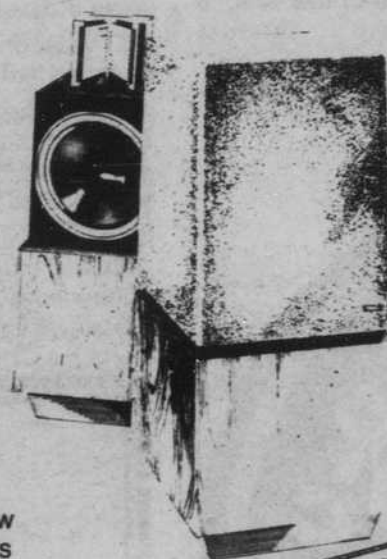

Barry Manilow

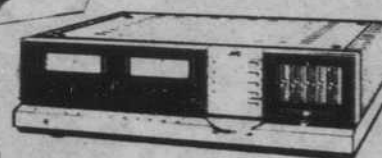

Model KD-65

JVC

At Napier Audio we know that JVC cassette decks can capture all the great sounds you want... and recording star Barry Manilow said - and we quote - "I didn't think any stereo manufacturer could compete with the kind of quality I'm used to. When I brought my work tapes home from the studio and played them on JVC equipment, it was as close to a studio performance as I could get."
