Phase Linear®
THE POWERFUL DIFFERENCE

True "State of the Art" performance from separate components that are legendary for their value/performance ratio. Make your comparisons, and you'll get Phase Linear.

MODEL 700 II
POWER AMPLIFIER

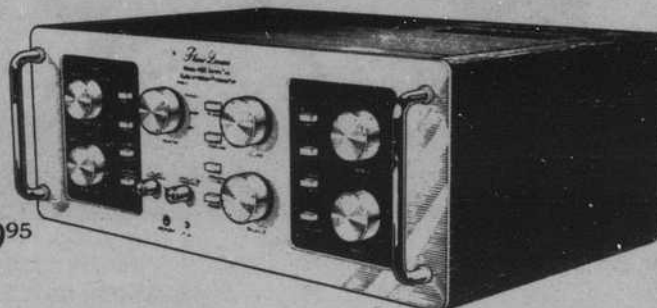

\$799⁹⁵

Clear and quiet throughout. Designed to reduce noise and increase dynamic range. The auto correlator is built right in for convenience. This is a truly superb pre-amp at our lowest price ever.

\$599⁹⁵

reg. \$699⁹⁵

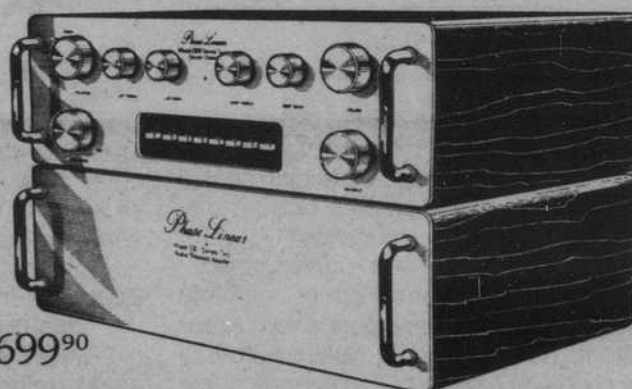

MODEL 4000 II
PREAMPLIFIER

A legend in its own time. A whopping 700 watts RMS total both channels. Power for most any conceivable need. Can operate in either direct coupled or normal mode. A powerful and flexible power source for those who want a true "concert hall" sound.

reg. \$899⁹⁵

SYSTEM 2200
MODEL 200 II POWER AMPLIFIER
AND MODEL 2000 II PREAMPLIFIER

These components can be purchased separately or together as a system. By combining the Model 200 II power amplifier with the Phase Linear 2000 II preamplifier you have the basis of a music system far surpassing the performance of the typical receiver. The system delivers: lower distortion, wider dynamic range, faster transient response and greater flexibility. The Phase 200 II Power amp is reduced to \$369.95 and the 2000 II pre-amp is reduced to \$269.95.

\$639⁹⁰

reg. \$699⁹⁰

MODEL 400 II
POWER AMPLIFIER

\$549⁹⁵

The Phase Linear 400 is the best stereo power amplifier in its power range. There are many reasons for this, but most outstanding is the "made one at a time craftsmanship" that goes into each unit.

If you want to hear a new set of speakers without selling your old ones, install the Phase Linear 400.

Power: 201 watts per channel, minimum R.M.S. at 8 ohms from 20Hz to 20KHz, with no more than 0.25% THD.

reg. \$629⁹⁵

MODEL 1000
AUTO CORRELATION AND DYNAMIC
RANGE RECOVERY SYSTEM

\$299⁹⁵

reg. \$349⁹⁵

Even the finest high fidelity systems are ultimately limited in performance by the quality and nature of the source being played. The Phase Linear 1000 features the Auto Correlator and Dynamic Range Recovery System. With its advanced circuitry, it increases the overall effective signal-to-noise ratio and the dynamic range by a whopping 17.5 dB with any stereo source (records, FM, or tape). The Phase Linear 1000 may be used with almost any existing stereo system.

EARWAX Album - preview on KZEL-FM 96 Monday-Thursday evenings, Sunday afternoon.
