

INTRODUCING THE NEW PHILLIPS LINE FOR 1979

NEW TURNTABLES FROM PHILLIPS

These three new Phillips turntables offer the best turntable values on the market. Again, they're specially priced through next week.

DON'T SETTLE FOR ANYTHING LESS

The biggest investment in most home hi-fi is probably in records. For this reason, the 685 is the least expensive turntable we sell.

AF 685 - Reg. \$139.95

\$99

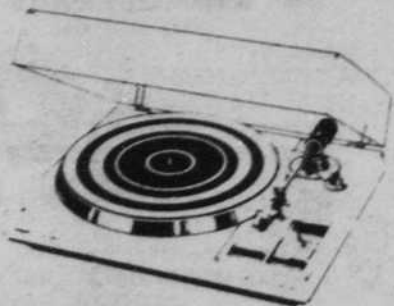

OUR MOST POPULAR

The Phillips 677 is their best buy, and not surprisingly, our best selling tonearm. It offers a better turntable than the 685 and it also features "direct control", a very useful mechanism that insures absolute speed accuracy.

AF 677 - Reg. \$159.95

\$129

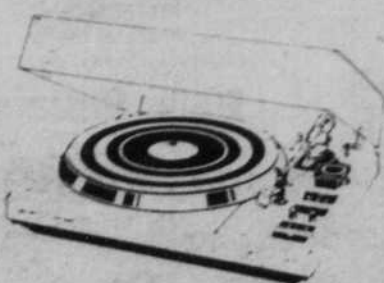

ALL OF THE ABOVE + A LITTLE MORE

Essentially equivalent to the 677 in terms of performance, the 867 offers electronic switching for the ultimate in reliability, and a very novel LED strobe readout.

AF 867 - Reg. \$219.95

\$179

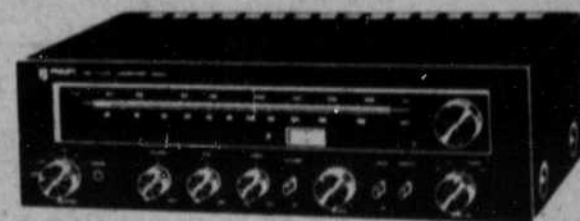

PHILLIPS RECEIVERS

Primarily known for their turntables, Phillips has introduced a new line of receivers that represent exceptionally fine values in terms of power and features. They also offer unique styling. We're commemorating their debut with special prices through next week.

AH7841 - 20 Watts X 2

Reg. \$219.95

\$179

AH 7851 - 30 Watts X 2

Reg. \$289.95

\$229

Headphone

Special!!

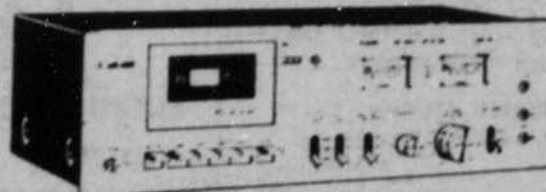

Koss K6 \$32.50

Pro 4 Double A's \$39.00

Techniss EAH 820 \$35.00

NO SYSTEM IS COMPLETE WITHOUT A CASSETTE DECK

Phillips was the inventor of the cassette format and holds exclusive patent. All cassette manufacturers do so only under license from Phillips. It's not surprising then that Phillips makes a very fine cassette deck, the N2635. It's a really outstanding value at the special price at which we're offering it through next week.

PHILLIPS N2635 - Reg. \$229.95

\$179

OUTSTANDING SPEAKER VALUES WHEN PURCHASED WITH A PHILLIPS SYSTEM

JBL L19

JBL has taken their 4301 compact professional broadcast monitor, a big favorite of radio stations, and dressed it up for home use. JBL's L19 is a 2-way system acoustically identical to the 4301. It delivers the kind of accuracy that sound engineers depend on.

Reg. \$175

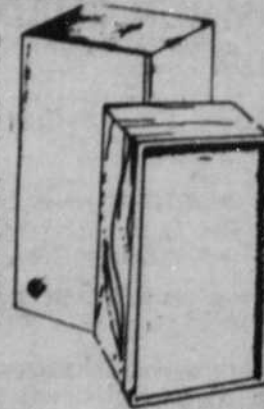

\$149

CIZEK 3

Cizek has earned a solid reputation nationwide for manufacturing very accurate loudspeakers at a very modest cost. They only make three loudspeaker systems (plus a subwoofer). Their best, the model 1, lists for \$219 and has consistently received rave reviews in audiophile publications. The new model 3 is their least expensive and is priced at just over \$100. We doubt if there is a better speaker value today.

Reg. \$105
