

**100 watts tickles its tweeters.
And that's only scratching the surface.
Panasonic Sound Pumps™ 100 car speakers.**

Sound Pumps 100 speakers can physically handle 100 watts. There are only a few car speakers that can handle that much power without collapsing into a state of distortion. But Panasonic puts all that power through a 4-way speaker system, because we realize you don't just listen to watts. You listen to music.

That's why Sound Pumps 100 has a 6" x 9" woofer with a 30-oz. magnet (50 per cent heavier than the leading brand). So at 100 watts or even at 3 watts, all bass notes sound rich. In addition to a midrange driver, it has two piezoelectric tweeters designed with a 12-degree pitch to disperse the highs evenly throughout your car.

The result is a car speaker that not only can handle power, but can perform a range of acoustic calisthenics that most other car speakers can't.

Panasonic car speakers put the music in great shape.

They come in 20 models, in different styles and shapes to fit almost every car. Sound Pumps 100 comes in a full-range, 6" x 9" size (EAB-920) and a 5" round (EAB-910) midrange/high-range door speaker.

Exercise the Panasonic Sound Pumps 100. They'll handle the toughest musical workout you can give them.

Panasonic.
just slightly ahead of our time.
