Nobel Prize-winning physicist speaks

A Nobel Prize-winning physicist will discuss the application of surface physics to immunology tonight.

Ivan Giaever, since 1973 a research immunologist at the General Electric Research and Development Center, will speak at 4:30 p.m. in Room 123 Science I. His talk is part of a series of colloquia sponsored by the physics department.

Giaever's lecture is expected to be of particular interest to physicians, health care professionals and biomedical researchers, according to physics Prof. Rudolph Hwa, series coordinator.

A member of the National Academy of Sciences, Giaever was a Guggenheim fellow at Cambridge University in 1969-70 and a visiting professor at the Salk Institute in 1976. He received the Nobel Prize in physics in 1973.

Besides his studies of surface physics, Giaever's research interests include tunneling, superconductivity, heat transfer, stress analysis and field ion microscopy.

Giaever holds degrees from the Technical University of Norway and from Rensselaer Polytechnic Institute.
