

ask the sexpert

What is "spanish fly?" Is it really an aphrodisiac?

Spanish fly is derived from dried and pulverized beetles.

When taken internally it causes an irritation in the genital and urinary tracts.

This can produce an erection

in men because of the dialation of local blood vessels, but does not increase sexual desire. Moreover, spanish fly when ta-

ken in excess, can cause violent illness or death.

I am 19 and have never had a pap smear. Do I need one, even if I have never had intercourse?

A pap smear is recommended for all women 18 and older. The pap smear (named for Dr. Papanicolaou, who developed it) is a procedure used to detect the presence of cancer or other abnormal cells on the cervix, the entrance to the uterus at the end of the vagina.

The pap smear is simple and painless. It takes about two seconds to gently scrape some cell tissue of the cervix. This tissue is then sent to a laboratory to be analyzed. Most

women feel nothing at all, or perhaps some pressure.

Even though the risk of cervical cancer is higher in women who are having sexual intercourse, all adult women should have at least one pap smear, regardless of their sexual experience or preference.

WWII hero Omar Bradley dead

NEW YORK (AP) — Gen. Omar Bradley, who led a million U.S. soldiers in World War II and was the nation's last five-star general, died Wednesday at the age of 88, Pentagon officers said in Washington.

He died at a hospital in New York City, the officers said.

His last public appearance was at President

Reagan's inauguration.

He led the U.S. Second Corps to victories in Tunisia and Sicily and was senior commander of American ground forces in the mid-1944 Anglo-American invasion of Europe.

Germany lost the battle of France when Bradley outwitted the Nazis' best with a spectacular breakthrough west of St. Lo.
