

Changes sweep P.E. dept.

Physical education personnel say they like to use "emotive" words to describe the new philosophy of self-support adopted by the department. Students will benefit, they say, from this stricter yet more responsive program.

Look no farther than the physical education department to see the effects of this summer's budget cuts.

A new physical education fee, redesigned locker rooms, fenced-off tennis and racquetball courts, restricted facility access and an extensive reservation program all go into effect this fall — and more changes are planned.

The changes are the department's response to a \$500,000 "gym suit service" cut made by the Oregon Legislature this summer. That \$500,000 actually paid for a great deal more than washing gym suits, says dean Celeste Ulrich, including chlorine in the pools, lifeguards, security, locks, sanitation and supervision.

Although the State Board of Higher Education levied a \$3 per term fee this summer to help

make up the difference, the physical education department interprets the one-half-million-dollar cut as a clear indication of the Legislature's opinion of physical education support.

"There's no way for \$3 per term that we can give students what we did last year," Ulrich says.

She says she expects the Legislature to totally eliminate physical education support for 1982-83, the second year of the biennium. Anticipating that, Ulrich and other physical education staff members have adopted a totally new outlook for providing recreational services to University students.

To begin with, Ulrich says either she or physical education head Michael Ellis "probably" will propose the elimination of the physical education requirement early this year at a faculty assembly meeting.
