SHARP All-Purpose Calculators

The EL-211

- 8-digit calculator with liquid crystal display.
- Square root and one-touch percent keys.
- 3-key independent memory system.
- Automatic Power-Off (A.P.O.)
- Constant/reciprocal
- Add-on/discount calculations.
- Up to 10,000 hours of operation.

Reg. \$10.95

NOW \$10⁴⁹

The EL-210 is an economical, value-packed, pocket-size calculator with 8-digit display and 5-key memory.

- Independent memory with CM RM M M- x-M keys.
- Easy-to-read, bright green 8-digit fluorescent display.
- One-touch percent key.
- Square root function.
- Includes batteries.
- Optional rechargeable Ni-Cd battery pack (EA-18) and AC adaptor/charger (EA-17)

Reg. \$11.95

The EL-8160 is more than a calculator. This high-styled, ultra-slim, alphanumeric calculator is also a memo pad with rolling writer display.

- Highly visible 8-digit dot matrix liquid crystal display. As you enter letters or numbers, the display rolls to the left for up to 24 characters.
- 4-key independently accessible memory and Storage Computer™ protects your entries even when the power is turned off.
- Memory Safe-Guard™
- Sensor Touch™ entry panel has dual function keys; numbers and letters.
- Auto Power-Off (A.P.O.) functions for extended battery life.
- Vinyl wallet and battery included.

Reg. \$29.95

NOW \$22⁵⁰

The EL-8162 is a beautiful combination of slim design calculator and liquid crystal digital watch.

- 8-digit liquid crystal display.
- Built-in clock has date/hour/minute/second, alarm, calendar, and stop watch (with lap time) functions.
- Audible "input check" tone.
- One-touch percent key.
- Constant/reciprocal calculations.
- Symbols include minus, error, memory, AM/PM, audible input check, alarm, STP/LAP, battery indicators.
- Includes wallet case and batteries.

Reg. \$34.95

NOW \$29⁹⁵

Under Construction : A sour economy put the project on hold

Continued from Page 1B

Oregon it was promised to him that we would be improving our facilities. At that time a project like the stadium club was discussed with Rich as was the new arena," Bay says.

Originally the athletic department had hoped to begin construction in late spring and have the stadium club finished before Oregon's home opener.

Those plans didn't work out, but Bay says he is hopeful construction will be done by late December.

Drawing board

While plans for the stadium club are well into the construction phase, the proposed dome is still sitting on the \$150,000 drawing board that the University paid Rossman and Partners of Phoenix, Ariz., for preliminary architectural plans.

A price tag of \$14.25 million was attached to the proposed dome, and the University developed a plan for raising the funds entirely from private donors.

The plan, based on cash gifts of \$5.5 million, ticket subscriptions of \$6.38 million and gifts in kind (lumber, cement, etc.) of \$2.36 million, looked in good shape when former Athletic Director John Caine announced in December of 1979 that \$6 million had already been pledged.

"It will be at least another year," said Caine in reference to the start of construction.

But then the full force of a rapidly souring economy in Lane County crunched into plans for the dome, and almost in tandem came revelations of widespread wrongdoings in the athletic department.

Almost as rapidly as the money had begun pouring in, the flow slowed to a trickle.

"It was a combination of the economy to some degree plus some of the problems that had occurred in the last year and a half," says Bay. "Both of those combined with maybe some other factors just mitigated against the climate to continue a major fund drive which would be perceived as an athletic department venture."

Finally, there was the uncertainty of when Caine, who was a major force in pushing for the arena, would leave and who the new athletic director would be.

It seems that Bay is as ardent a supporter of the

McArthur Court, built in 1926 and expanded and remodeled seemingly countless times, has served the University of Oregon well.

dome as Caine was.

Bay considers the dome a high-priority item, one of three areas where he hopes to see a great deal of progress in the near future.

"I think there are three areas where we have to get to work immediately in terms of our fund raising, and those three areas are, number one, to increase our

donor base — people who give annually, in a very general way, unrestricted funds to the athletic department. The other two areas have to do with larger single gifts that are going to be related to endowments."

One area is scholarships and the other is capital improvements, which includes the stadium club and the arena, Bay says.

"The capital-improvement area is one area we absolutely have to get after," Bay says. "(It) is a high priority item."

Generating pledges

Generating pledges of \$6 million dollars again won't be easy, according to Bay, because the large donors that are crucial to the funding drive have been hit heavily by poor economic conditions.

Because of the tight money situation, Bay believes the best way may be to go with an incremental plan for building the arena, with the offices and lockerrooms in the first phase.

Once Balogh finishes looking into the current state of the arena, Bay says he should have a feeling for whether or not he can proceed on the project immediately.

"Once we have a feeling for whether we can proceed immediately on the project, in total or in part, then we want to move as swiftly as we can. I say 'in part' because from time to time we discuss the possibility of perhaps building a quadrant of the arena in order to gain some badly needed facilities immediately and then from there piecemeal it — if that's feasible — and hope that in putting up the project that the development in itself generates some momentum for us to maybe complete the project."

Facilities for the football team are of primary importance right now, says Bay, and that will probably affect any decision.

For now, all of that is still a \$150,000 architects conception.

And the words that Caine delivered to an Oregon Club luncheon in 1979 still hold true.

"We have the opportunity to construct a facility for student, faculty and community use.

"But it is up to you."

Duck Dome

If the Duck-Dome ever becomes a reality, its impact on the University would be dramatic. Aside from its benefits for the athletic department, such as 17,000 seats for basketball and new office and storage space, many other uses are planned within its 413,000 square feet.

Up to 50,000 square feet could be utilized for badly needed library storage space. The University Printing Department could be relocated in the Dome, clearing out needed space in the Journalism building. Facilities for campus radio and television facilities, such as KWAX could be provided, as well as classrooms and offices for a variety of University programs.

Commercial calculator with impact printer and display.
All 25% Off

TI-5217

Tested for heavy commercial use, this rugged desk-top calculator handles all bookkeeping functions. Built around a high-speed printer, 2.8 lines per second, the TI-5217 utilizes economical standard size paper. The TI-5217 has two-color printing: addition and positive results in black, and subtraction and negative results in red. Come in and check out these special calculators.

TI-5217

8-digit LCD thin notebook music calculator with time and date.

- 11-note musical scale with vibrato.
- 12 Pre-programmed melodies for alarms, special dates such as birthday, anniversary, Christmas.
- 2 Alarms, 2 date memories, time signal, stop watch.

CLOCK: hour, minute, second, AM/PM.
CALENDAR: year, month, date.
CALCULATOR: four basic function, constant, percent, square root, independent memory.
POWER SOURCE: DC only, 2 silver oxide batteries (G-10), included.
