NOTICE OF APPLICATION FOR PRELIMINARY PERMIT

(November 10, 1981) Take notice that J.R. Ferguson and Associates, Incorporated (Applicant) filed on September 3, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. ss791(a)-825(r)) for Project No. 5212 to be known as the Westfir Water Power Project located at an existing dam owned by Westfir Energy Company Inc. on North Fork of Middle Fork Willamette River in Lane County, Oregon. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. John Bogardus, J.R. Ferguson and Associates, Inc., 25 G Street S, Lakeview, Oregon 97630.

Project Description - The proposed project, to be located at one of the two potential sites, would consist of: (1) a 10-foot diameter penstock, (2) a powerhouse with an installed capacity of 2,250 kW, and (3) a 5-mile long, 12-kV transmission line from the powerhouse to an existing Lane County Electric Cooperative transmission line. The Applicant estimates that the average energy production would be 10,5000 kWh. **Proposed Scope of Studies under Permit** - A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 18 months during which it would conduct technical, environmental and economic studies, and also prepare an FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be \$100,000. **Competing Applications** - Anyone desiring to file a competing application must submit to the Commission, on or before Jan. 7, 1982, either the competing application itself (See 18 C.F.R. s4.23(a) and (d)(1980)) or a notice of intent (See 18 C.F.R. s4.23(b) and (c)(1980)) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in s4.23(c). **Agency Comments** - Federal, State, and local agencies are invited to submit comments on the described application (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments. **Comments, Protests, or Petitions to Intervene** - Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 C.F.R. s1.8 or s1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petition to intervene must be received on or before Jan. 7, 1982. **Filing and Service of Responsive Documents** - Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice. Kenneth F. Plumb, Secretary.

If you think "high bias" is discrimination against tall people, you're not ready for New Memorex.

High bias tape is specially formulated to deliver remarkably improved sound reproduction, particularly in the higher frequencies.

And no high bias tape does that better than totally new Memorex HIGH BIAS II.

We've developed a unique new formulation of superfine ferrite crystal oxide particles. And while that's a mouthful to say, it delivers an earful of results.

Singers ring out more clearly. Snare drums snap and cymbals

shimmer with startling crispness.

Even quiet passages sound clearer. Because new Memorex HIGH BIAS II has 4 to 5dB lower noise. Which means dramatically reduced tape hiss.

And thanks to Permapass™, our extraordinary new binding process, the music you put on the tape stays on the tape. Play after play, even after 1,000 plays.

In fact, new Memorex will always deliver true sound

reproduction. Or we'll replace it. Free.

So trust your next recording to new Memorex. In HIGH BIAS II, normal bias MRX I or METAL IV.

As a discriminating tape user, you'll have a high opinion of the results.

A highly biased opinion, that is.

HOW MORE THAN EVER
WE ASK: IS IT LIVE, OR IS IT
MEMOREX

Ready? Get a Memorex HIGH BIAS II Cassette for \$1.00.
