

Realistic® System Seven.

The Biggest Sound in Little Stereo Systems!

Designed With Today's Lifestyle in Mind. Trim, functional and efficient, our remarkable System Seven fits in with modern, streamlined living. It's perfect anywhere space is at a premium and you want premium sound. The low-profile STA-7 receiver in its bold-looking jet-black metal case is just 3½-in. high! Yet it delivers a full 10 watts per channel, minimum rms into 8 ohms from 20-20,000 Hz, with no more than 0.4% total harmonic distortion. Our matching Minimus®-7 cast-aluminum two-way speaker systems are less than 8-inches high, and easily fit on a bookshelf.

Equalized for Deep Bass From Mini Speakers. Special "EQ" circuitry tailors the amplifier's response for uniform energy output at all frequencies from Minimus-7 and other "mini" speakers. You'll be surprised at just how good the speakers sound! Here's what *Stereo Review Magazine* has to say about Minimus-7:

*"The panel found its sense of openness, level of definition, reproduction of musical detail, and stereo imaging were all quite good . . . power handling above average . . . a good buy."**

A switch lets you select equalized "System" output when using mini speakers, or "Flat" output for use with larger speakers.

Small Size Doesn't Mean Small Sound. Don't let the size of System Seven fool you. It has the features you'd expect to find in full-size, higher-priced, stereo components. We know! Because System Seven was engineered by Radio Shack, and is manufactured in one of our own 28 factories.

Advanced Circuit Design. The FM tuner has an FET (Field Effect Transistor) for extra-high sensitivity and low noise so you can hear even weaker, more distant stations clearly. A PLL (phase-locked loop) in the FM multiplex circuit assures you of full channel separation for exceptional stereo imagery. Another important feature is a linear power IC that provides high-gain and low-distortion for clean, clear sound with plenty of dynamic punch.

Operating Ease. Smooth, weighted fly-wheel tuning, and an illuminated signal-strength meter make station selection easy. Detented bass and treble controls let you adjust the music the

way you like, and a loudness button gives you full-range sound even at low listening levels.

The Heart of a Fine Music System. A magnetic phono input lets you use the finest quality changers and turntables to play records through your system. There are input and output jacks for recording and playing tapes plus a button that gives you true off-the-tape monitoring when recording with a three-head deck. You can also add an equalizer or other sound processing accessory. An aux input allows you to play a second tape deck or TV sound through System Seven. Other features: A and B speaker switching, headphone jack for private listening, AC convenience outlet.

Maximum Sound, Minimum Size and Price. Come in and try out System Seven for yourself. It's the result of over two years of development, plus our 61 years of experience in electronics. Covered by our limited warranty on both parts and labor, of course—two years for the receiver, five years for the speakers**. System Seven is just \$249. You save \$30.85 off our regular \$279.85 "each" price!
