Regan denies using Fed as scapegoat

WASHINGTON

Treasury Secretary Donald Regan, denying the Federal Reserve Board is being used as a scapegoat, said Sunday the administration "will take the blame or the credit" for what happens to the economy.

In an interview on CBS's "Face the Nation," Regan downplayed the amount of friction that appears to be developing between the White House and the powerful, independent Fed over how to end a worsening recession and return the nation to prosperity.

"We are not trying to make the Fed a scapegoat..." Regan said. "First of all, we'll take the blame or the credit for what's going to happen to this economy. I think it will be credit."

But Regan also stood by his stern public complaints of last week that the Fed's erratic swings between overly tight and overly loose credit helped cause the current recession, and more recently has triggered a rise in interest rates.

"What we are asking them is to please be consistent in their monetary policy so that our program will have a chance to work," Regan said. "If they have an erratic program then this confuses business leaders, the people who work and operate in the money markets."

Fed Chairman Paul Volcker and other senior reserve officials have expressed concern that unless the president reduces the record deficits that loom ahead, interest rates will surge again and prevent economic recovery from occurring.

with youths in Gdansk over the weekend in the first major outbreak of violent protest to martial law since troops opened fire on striking miners shortly after the military crackdown began.

The Interior Ministry said eight police and six civilians were injured in the rioting, and 205 people were put in detention and were to face summary trials. The violence occurred Saturday but was not reported until Sunday. Telephone communications with Gdansk are not possible, and Western reporters are not allowed to travel outside Warsaw.

Radio Warsaw reported an immediate government crackdown on the city, with private telephone service cut off and civilians forbidden to be on the streets after 8 p.m. or before 5 a.m.

It was the worst clash reported in Gdansk, headquarters of the independent labor union Solidarity, since force was used to put down violent demonstrations that erupted there shortly after the imposition of martial law Dec. 13. The military government has acknowledged nine deaths in martial law protests since Dec. 13.

During the melee, some protesters ignored authorities' calls for order, attempted to storm public buildings and "behaved aggressively" toward police, the communique said, adding that calm prevailed by evening.

The rioting did not appear to be connected with sweeping food price increases scheduled to go into effect Monday. The cost of meat, poultry, sausage and other foodstuffs will rise 200 to 300 percent or more in the largest price increases in Poland's post-war history.
