GRAND OPENING CELEBRATION

***** 411 EAST BROADWAY, EUGENE *****

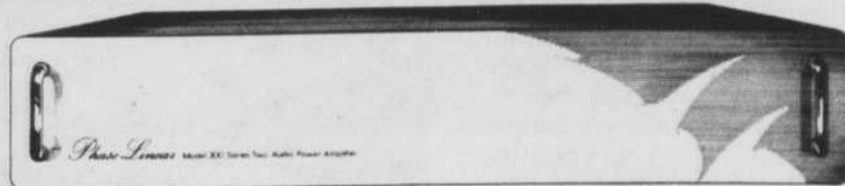

\$1000 OFF ON PHASE LINEAR

Reg. 775.

Phase Linear

3300 / 3000

Reg. 685.

Phase Linear has long been a very respected manufacturer of separate hi-fi components. This makes the savings on the 3300 and 3000 combination all the more remarkable! We're offering this combination for substantially lower than normal dealer invoice cost. Words like "unbelievable and incredible," and phrases like "once in a million" are often banded about in advertising copy; however, in this instance we feel the adjectives are justified. Because of the way we purchased these units, we honestly believe that no other store in the country can sell these units at the price we are offering them. And remember, these are not seconds, reconditioned, or in any other way less than mint condition in factory sealed cartons, and carry the full Phase Linear factory warranty of three years parts and labor.

\$399

Both only . . .

Pyramid Met 7

The Met 7 is a mini-speaker manufactured and designed by audio pioneer Dick Segueria, who first achieved acclaim as the designer of the classic Marantz 10 b tuner almost 30 years ago. Leading audio journals have termed the Met 7s as the best speaker on the market under \$300 — a particularly remarkable accomplishment when you consider that the Met 7 is small enough to be held in the palm of your hand.

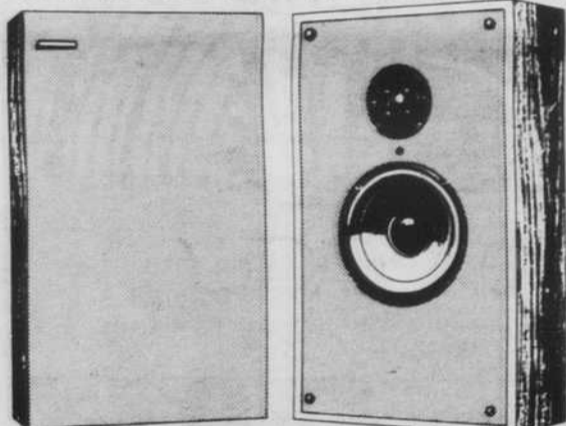

\$295 pr.

M & K Satellite-Volkwoofer/Systems

M & K is a leader in the production of digital and direct-to-disc recordings through their Real Time Record Label. The M & K Satellite-Volkwoofer System was designed as a monitor speaker system to reproduce the sharp transients and increased dynamic range of these state-of-the-art discs and tapes.

\$650 system

Boston Acoustics

Boston Acoustics is a relatively new company. But the man who designs Boston's speakers is not new to the field. His name is Andy Petite, and he has the unique distinction of having designed two of the five best-selling speakers in North America. And the first speaker he designed at Boston Acoustics was voted "Speaker of the Year" in a nationwide poll of audio retailers. That speaker, the A-100, is on special during our grand opening at a savings of over \$100 per pair.

Boston **\$149** ea. A-100

JBL SPEAKER SAVINGS

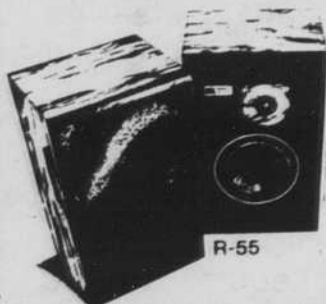

JBL speakers are the overwhelming choice of recording engineers and professional musicians. Rarely do you find their speakers at the savings at which we're able to offer them.

JBL R55 This speaker is from JBL's Radiance line. It's the least expensive system that JBL manufactures. It's a two-way system enclosed in a walnut-vinyl cabinet.

Reg. \$149 ea.

\$89

Each

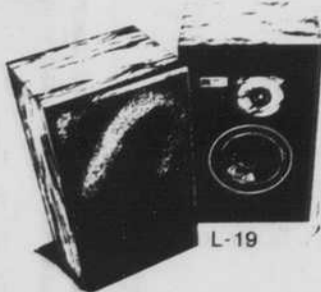

JBL 19 JBL took their 4301 compact professional broadcast monitor — a big favorite of radio stations — and dressed it up for home use. It's acoustically identical to the 4301 except that it comes in a hand-finished walnut veneer enclosure.

Reg. 199.00 ea.

\$129

Each

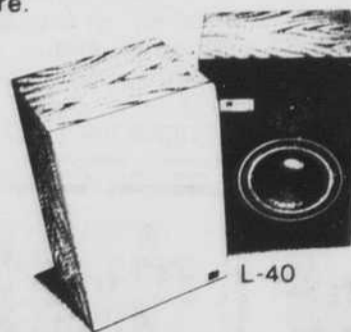

JBL L40 Similar to the L-19 except that it has a larger bass driver and a larger enclosure.

Reg. \$249 ea.

\$179

Each
