GRAND OPENING CELEBRATION

★★★★★★★★★★★★★★★★★★★★411 EAST BROADWAY, EUGENE★★★★★★★★★★★★★★★★★★★★

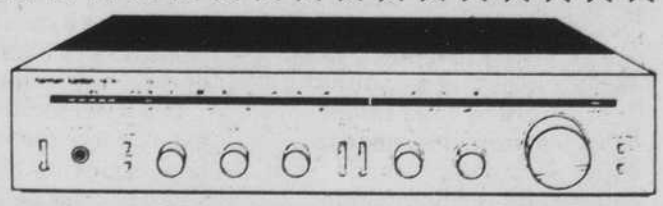
Harmon/Kardon

Harmon/Kardon is our primary line of electronics. The reason is simple — we feel that for the money they consistently manufacture the best electronics in the business. One reason is that they don't try to be everything to everybody. You won't find Harmon/Kardon promoting "HK Systems" complete with lots of HK speakers and HK turntables. They stick to what they do best.

And because they cater to the discriminating listener, they don't use electronic tricks to play the "specs" game. So you won't find them using excessive amounts of negative feedback to improve distortion figures or poorer sounding but cheaper IC's instead of discrete components. They rely on 25 years of solid engineering experience to sell their product.

Harmon/Kardon

740 Receiver



The HK 740 Receiver shares the same styling and performance as HK's renowned 700 series of high-end components. It's conservatively rated at 30 watts per channel and because of its torroidial power supply, common to all the HK 700 series electronics, it can easily handle peaks of twice that amount. In the past the HK 740 has been a very popular receiver at its regular selling pirce of $349. We're offering them at savings of $100. Upgrade your present electronics or if you're a first time buyer, you can purchase the HK 740 with one of our speakers and turntables we have on special and get the kind of sound quality that most people buy in their second or third generation component systems.

$249

Dual 508 Turntables

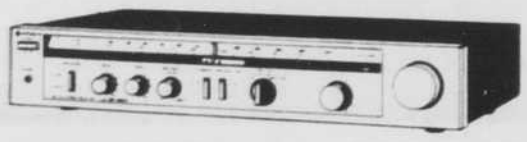
The Dual 508 is a new semi-automatic turntable from United Audio. Particularly outstanding is the dual tonearm. It alone is worth the price of the turntable. It'll track any cartridge on the market. The 508's a great turntable value at its under $200 list price. During our Grand Opening

It's only... $119

Harmon/Kardon 100M Cassette Deck

The 100M is Harmon/Kardon's least expensive cassette deck. Because of the exceptional frequency response common to all Harmon/Kardon cassette decks, even the 100M is capable of sound reproduction that is all but undistinguishable from the original. Sonically we feel it's superior to any other deck on the market under $300. During our Grand Opening

It's only... $209



SR-2000 Receiver

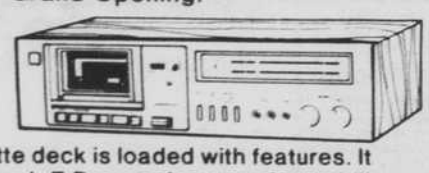
The Hitaci SR-2000 reveiver features slim-line styling and 25 watts per channel. It comes with a three year parts & labor warranty. Hard to beat at our Grand Opening special price of

$149

HITACHI

Hitach: has long been a leader in the manufacturer of affordable hi-fi equipment. They have consistently offered very good cost versus performance value. We've tken this philosophy one step further during our Grand Opening.

Cassette Deck DE 55



The Hitachi DE 55 cassette deck is loaded with features. It has full solenoid operation, L.E.D. metering, metal capability and of course, dolby noise reduction. The DE 55 also allows the user to automatically rewind the tape at the end of play. In addition, you can program the deck to automatically rewind the tape at the end of play and then have it replay the same side for uninterrupted listening. The DE 55 is backed by a two year parts and labor warranty. All in all, a lot of performance for a deck under $300. And during our Grand Opening

It's only... $179

Turntable

HT-20S

The Hitachi HT-20S is a very popular table. It features quiet belt-drive operation, an ultra-light tonearm capable of tracking almost any cartridge available, and it has a two year parts and labor warranty. During our Grand Opening

It's only... $79

Here's a partial listing of the many products we are featuring at close-out prices. Many items not listed also include car stereo equipment, head phones and cartridges. Most items are "new", some demos and carry full manufacturer's warranty.
