

YOUR TURNTABLE MAY NEED THIS \$39.95* UPGRADE

Check your turntable for these symptoms:

- **LOSS OF HIGH FREQUENCIES** - Realize that as your cartridge slowly wears out your ear is daily getting used to the sound, so try to remember what the system sounded like when it was new.
- **DISTORTION IN MID-RANGE AND HIGH FREQUENCIES** - Generally indicates a badly worn stylus (needle) or a maladjustment in cartridge overhang and offset angle (which eventually damages your record collection).
- **INCREASE IN BACKGROUND NOISE** - More noticeable between tracks on the record, this could mean a simple tracking force adjustment is necessary, or it could be indicating a breakdown in the damping material around the cantilever.

*NAPIER AUDIO'S \$39.95 UPGRADE INCLUDES:

- Your choice of either a GRADO GF3E+ cartridge (\$55.00 value) or a SONUS SR-202 cartridge (\$60.00 value).
- FREE set-up and adjustment of the cartridge in your turntable (includes mounting, tracking force, overhang and offset angle adjustments - please bring in your turntable for these adjustments).
- Your positive confirmation of increased quality of sound after auditioning your new cartridge (if not satisfied, we'll void this transaction - you can't lose!)

YOUR RECORDS WILL THANK YOU!

HAPPY BIRTHDAY LOLO

TOM G. You SAE man, when we said lets get
drunk you said "I'll do what I can," as the night
wore on and the Chi Chi's started to flow, I had
no idea things were starting to go, the straight
shots with Sarah sure looked like fun, when you
told here you'd out drink her you jumped the
gun, the **Buffet Party** was said to be a success,
I hope you had as much fun as all the rest. 5-7
