# Heard about the Cervical Cap?

The Cervical Cap is used as a barrier method of birth control. It is a thimble shaped cap made out of rubber which fits tightly over the neck of the cervix, preventing sperm from entering the uterus. The cap was used in this country years ago, but has not gained popularity until recently.

It has been used for years successfully in Western Europe. At this time the cervical cap is not approved by the Food and Drug Administration (FDA). Studies are being done to determine its current effectiveness and safety.
