SONY
"TRANSOUND"

THE PORTABLE COMPONENT
STEREO THAT HANDS YOU
EVERYTHING EXCEPT A
COMPONENT PRICE.

Look under the handle of this CFS-700 Transound Stereo and you'll see a component-quality, AM-FM cassette stereo system, cradled into a rugged case. What you won't see is a high component price. Yet the CFS-700 Transound Stereo sounds as rich as a good home system. Except, as you can see, you can take it with you. Camping, traveling, partying by a pool or relaxing at home. The speakers adjust up and down to direct their sound or easily detach for wider stereo separation. The Automatic Music Sensor finds your favorite songs in seconds by speeding the cassette tape forward or backward to the next selection. There are microphone inputs for live recordings. And you can power the CFS-700 with batteries, a detachable AC cord or from a cigarette lighter in a car. That, we think you'll agree, is the stereo system that hands you everything you're looking for. The Sony CFS-700 Transound Stereo.

RECORDING
STEREO
TO GO!
TCS-310

ONE LOOK
AND YOU WON'T
BELIEVE YOUR EARS.
SONY STEREO CASSETTE-CORDER.

You asked for it. You've got it. With truly portable stereo recording and playback capabilities, the lightweight, portable TCS-310 is creating a new standard in portable cassette entertainment. Thanks to featherweight, micro-size stereo headphones you get sensational stereo playback. And a built-in speaker also provides crystal-clear mono listening. You also get large, easy-to-use control buttons and metal tape playback capability. It's the smooth, precise, compact cassette-corder that's going places. Sony's TCS-310.
