

Burglars Raffles imitation doesn't fool sharp detectives

GREENWICH, Conn. (AP) — Burglars in this city of wooded estates and sailing yachts appear to be going by the book, thumbing through the pages of the Social Register to find a rich mark.

Police in Greenwich, where you can buy a Rolls-Royce or a Ferrari off the showroom floor, say two detectives going over routine crime statistics noticed a pattern in a series of home burglaries.

In most of the cases, telephone and burglar alarm wires to the house had been cut. Then they noted that most of the houses belonged to families listed in the elite Social Register, a guide to America's most

prominent families.

About 400 of the 50,000 names in the register have addresses in Greenwich, located in Fairfield County, one of the wealthiest areas in the country.

"You can't tell people not to be in the Social Register, no more than you can tell people not to put their names on mail boxes," said Greenwich detective Frank Branca. "This happened because these people used the Social Register rather than the telephone book, although I understand it is a very, very detailed book."

Branca described the burglars as "very sophisticated, not your run-of-the-mill neighborhood burglar."

In August, Branca and fellow detectives James Hirsch alerted federal and East Coast police agencies to the possible link between unsolved burglaries and the Social Register.

About 25 law enforcement officials from Massachusetts, New York and Connecticut met in Greenwich on Sept. 20 to compare notes. The FBI entered the case since several states were involved.

Since then, FBI agent Ronald Mahaffey said his office in Nassau County, N.Y., has received inquiries from police departments as far north as Boston involving burglaries police suspect may have been inspired by the register.

Reagan goes on TV with progress report

WASHINGTON (AP) — In the autumn of even-numbered years, a president's fancy often turns to thoughts of national television. Pres. Ronald Reagan is going on the air tonight, with what the White House calls a non-partisan progress report on the economic situation.

The Democrats, predictably, protest that there is no such thing as a non-partisan, nationally-televised address by a Republican president three weeks before congressional elections.

That is exactly what Republicans said when Democrats held the White House and roles were reversed.

The opposition party always demands, and usually get, broadcast time to respond to the president. But it is not equal time, no matter what the hour or the duration. No rebuttal commands the attention or the audience a president can muster.

Reagan's economic progress report was scheduled after the unemployment rate hit 10.1 percent, highest since the last days of the Great Depression.
