Reversal of the Aging Process Through the Transcendental Meditation and TM-Sidhi Programs
 Over the last 10 years, scientists have discovered that the TM technique can lower blood pressure, reduce stress, relieve insomnia, and improve IQ and reaction time. A recent study published in the International Journal of Neuroscience reported that TM participants were 5-12 years younger biologically than nonmeditating control subjects.

This film makes all the spirit and joy that was the 60's come alive once again.
