OM-10c is the 35mm SLR compact with features you'd expect from much higher priced cameras. Or never expect from any SLR at any price! The OM-10c features fully automatic "all-the-time" direct light measurement (DTL), measuring the light that actually reaches the film surface during exposures from a full 2 seconds to 1/1000. During self-timer operation the OM-10c beeps and blinks with a super bright LED. It's so surprisingly low priced you'll be thrilled at being able to afford so much camera.
