The future dawns

Sports medicine has advanced startlingly in the last decade, and nowhere are the changes more evident than in surgical techniques. The advent of the arthroscope has revolutionized the concept of surgery, and allowed athletes like Oregon's Leann Warren to undergo surgery without jeopardizing future athletic goals.

See page 4B

2B Knee Knowledge

Relatively little is known about knee injuries and rehabilitative exercises for injured knees. But University Prof. Lou Osternig is trying to change that with his research.

3B Shoe Sleuth

Prof. Barry Bates began his shoe research in 1976 because he felt knowledge about shoes and feet was almost nonexistent.

7B Shorts on assorted sports

The Emerald offers a weekly page of club sports scores, intramural highlights, statistics, announcements and calendars.
