much different from its predecessors.

"We made three big plays on defense on a day that we didn't play that well," said Brooks who saw Cal quarterback Gale Gilbert lead the Bears to 446 yards in total offense.

Safety Doug Judge made the other two defensive gems — a fumble recovery that led to Oregon's first score and interception of a Gilbert pass in the end zone to keep the Ducks ahead 14-7 at the half.

"It (Judge's interception) was a key play because even a field goal or whatever at that time would have really hurt our chances of coming out with a victory," said Brooks. "Having Cal come out of that with no points was a real boost."

Besides the defensive heroics, the offensive game continued to grow because of Miller's quarterbacking savvy. Countless times, the sophomore from Eugene kept the Oregon offense alive with clutch passing and a mobility that hampered California's defensive pursuit.

"Miller did some outstanding things...." said Brooks of his signal caller who was 12 of 22 passes for 197 yards and one big touchdown at the end. "He made a couple of plays early, one pass to (J.J.) Birden and one to (Kevin) McCall, scrambling out of the pocket just before stepping out of bounds. They kept drives alive and were just great athletic plays."

Brooks thought the Cal game was far from over when Barnes caught Miller's pass for the go-ahead score.

"I was certainly pleased, but I didn't believe the game was over by any stretch because they had two timeouts and could throw the ball," said Brooks remembering a last-minute loss to Cal two years ago when the Bears drove the field for a 10-7 win with, ironically, — only 53 seconds left.

The Ducks' defense headed Brooks' fears and put the clamps on Gilbert's aerial show for the game's final act.

"We made the plays we had to make," said Brooks. "That is the key to a team that has a lot of confidence in itself."

Confidence is something this Duck team is not lacking. Just ask Cal.

## Is your calculator in the same class you are?

Move up to the TI-66. The easy 512 step programmable.

You're into higher math and your old calculator helped get you there.

But now it's time for something more. The TI-66 offers full programming power and flexibility so you can solve complex and repetitive math problems quickly, easily and with fewer keystrokes than you thought possible. Its 512 merged program steps and over 170 built-in scientific, engineering and statistical functions make for powerful program-

ming. And the sleek, streamlined design makes for easy use.

Its Algebraic Operating System makes it easy on your brain by allowing you to key in problems as they are written, left to right. And a 10-digit angled Liquid Crystal Display not only makes it easy on your eyes but provides alphanumeric notation of your program steps so you can make easy modifications as you go along. There are large, readable keys for your fingers, and an easy-to-follow

guidebook so you shouldn't get confused.

And last, but certainly not least, at a suggested retail of \$69.95, there's a price that's easy on your pocketbook.

All in all, if we made the TI-66 programmable calculator any easier to use, it would deserve its own degree.
