FASTEST DEVELOPING IN TOWN*

*No, not really...

except by request on Ektachrome slide processing, 35mm Kodacolor developing and enlarging which takes 6 hours (Pick-up time is 10:00am). We like to take 2-4 days for print developing and up to two weeks for enlargements and other work. We frequently find that an order needs to be printed more than once to satisfy our lab's quality control inspector, and boy, is he picky! Other labs give you the first printing regardless of quality. By the way, all of your 35mm color negs come back in individual protective sleeves.

CHEAPEST*

*No, we're not that either but...

you really don't expect our kind of quality to be at discount store prices. Most of Eugene's professionals use our lab. P.S. We're not too expensive either - \$4.99 for 12 exposure Kodacolor II, if they all turn out.
