Correction

An article in Thursday's Emerald concerning loan defaulters incorrectly implied that the cost of the Chiles Business Center and the proposed science buildings would be less than \$17 million. Actually, the cost of the structures will be more than \$30 million. The Emerald regrets any confusion this may have caused.

It's 'Far Side,' but not by a long shot

First of all, a big thank you to all those who called or dropped by to let the Emerald know their feelings about the loss of the Doonesbury comic strip. We also received numerous suggestions for replacement cartoons, as well as submissions by student cartoonists. We needed your opinions and appreciate the interest.

Unfortunately, it was unanimously Doonesbury that readers wanted back, and we are sorry to hear this because Doonesbury has become impossible for us to obtain from Universal Press Syndicate any longer. It's no "communist plot" on our part — just the simple fact that we now have to "look elsewhere" for a second cartoon.

Some readers said they read the Emerald just for Doonesbury, and while this may be legitimate, we hope you will still read the paper. And we hope that you as well as "non-Doonesbury" fans will enjoy Gary Larson's "Far Side," which received many votes. The new strip will take a week most likely to secure, so until then Opus and clan will have to do.

Regarding the cartoonists who dropped by, Ross Martin and the staff are still reviewing your work and will get back to you. Your ambitious offers are impressive as a daily strip takes much work.

Again, thank you for your input. We're disappointed to lose Doonesbury, but problems with UPS literally beyond our control brought us to this point. (Note: the Oliphant editorial cartoons, also which we dearly love and receive from UPS, will disappear soon, too. We have not yet decided upon a new editorial cartoon but should do so soon. Your suggestions?)
