# State Board names Moseley vice president for research

By Andrew LaMar  
Of the Emerald

John Moseley was named University vice president for research Friday by the State Board of Higher Education. The appointment is effective immediately.

"I am delighted that the final choice was John Moseley, who has already done outstandingly well in the position of acting vice president," said University President Paul Olum.

Moseley, who has served temporarily in the post since last summer when former vice presi-

dent Richard Hersh resigned, will be in charge of the development of research at the University. Support for University research currently exceeds \$31 million annually.

"The opportunity to work with the outstanding research faculty at the University of Oregon is extremely attractive to me," Moseley said. "The atmosphere for research here... is perhaps the best in the country."

Moseley is a key representative in the development of the Riverfront Research Park and heads planning for a \$45 million project to construct new science buildings.

Moseley joined the University faculty in 1979 as an associate professor for physics and became head of the department in 1984. Between 1980 and 1984, Moseley served as the first director of the University's Chemical Physics Institute. Moseley has published in more than 70 professional publications.

The Georgia Institute of Technology awarded Moseley a master's degree in 1966 and a doctoral degree in 1969. He graduated first in his class from the school in 1964.

From 1964 to 1968, Moseley was a National Science Foundation Fellow at Georgia Tech. In 1968, he was appointed assistant professor of physics at the University of West Florida.

He joined the Stanford Research Institute as a physicist in the Molecular Physics Laboratory in 1969, where he served as senior physicist from 1974 to 1977, and as program manager of photochemistry from 1977 to 1979.

Between 1982 and 1985, Moseley served on the National Academy of Science Committee on Atomic and Molecular Science. He is listed in Who's Who in the West and Who's Who Frontier Science and Technology.

John Moseley

**ROSS UNIVERSITY**

Offers superior courses of study leading to qualified degrees in Medicine and Veterinary Medicine.

### SCHOOL OF MEDICINE

- American Medical School curriculum
- One of the highest pass rates on ECFMG by Ross graduates
- We have affiliations and working agreements with more than 30 hospitals in the United States where our students do their third and fourth years of clinical clerkships.
- Accredited by the government of Dominica
- Listed in WHO
- Very high percentage of our graduates doing residencies in U.S. hospitals, many of which are affiliated with U.S. medical schools
- Many of our graduates are now practicing in many states throughout the United States
- Many of our students are able to transfer into U.S. medical schools from our Basic Sciences
- We are approved in more states for clinical training and licensure than any other Caribbean School
- U.S. Department of Education Guaranteed Students Loans, VA benefits and a loan program for entering students are available.

### SCHOOL OF VETERINARY MEDICINE

- American Veterinary Medical School curriculum
- Accredited by the government of St. Kitts
- Listed in the AVMA
- 3 1/2 year veterinary medicine program both in St. Kitts and the United States
- Only foreign School of Veterinary Medicine doing clinical rotations in the United States
- U.S. Department of Education Guaranteed Student Loans, VA benefits and a loan program for entering students are available
- Our graduates have achieved outstanding scores on the state examinations.

## Group will add a staff person if students approve increase

By Stan Nelson  
Of the Emerald

The nation's first public interest research group formed at the University 15 years ago. And while the size and influence of the group has increased, funding has not.

The Oregon Student Public Interest Research Group is a statewide, student-run organization concerned with protecting consumers and the environment.

Because of inflation, the local chapter is asking students to increase funding 100 percent to \$2 per student per term, said Maureen Kirk, local OSPIRG chairwoman.

Student petitioners gathered 4,203 signatures by April 11 to place its funding request, Ballot Measure 3, on the general elections ballot. If the measure is approved in this week's ASUO election, the group will receive \$88,650 based on estimated enrollment figures for next year.

If defeated, OSPIRG can receive funding with the Incidental Fee Committee's approval of an alternative budget request.

Kirk said an additional staff person will be hired with the increased funding. The remaining funds will compensate for inflation and offset the low wages paid to the present staff per-

son, she said.

OSPIRG is the largest citizen organization in Oregon with 40,000 student members and 30,000 community members. The group's request comes at a time when other state OSPIRG chapters are suffering cutbacks.

Erik Nilsson, the state board vice chairman, said funding of other chapters is being cut back because OSPIRG is perceived by some as a political organization.

In addition to the University chapter, OSPIRG chapters are located at Lewis and Clark College, Oregon State University and Portland State University. Another chapter is being organized at Southern Oregon State College.

Only the Lewis and Clark chapter secured a funding increase for the 1986-87 school year. Each student will contribute \$1 per term to total about \$4,200.

PSU's chapter lost funding. The \$18,000 allocated to the chapter is \$1,000 less than what it received in funding this year.

OSU and SOSC have yet to receive funding for the upcoming year.

With the added funding, the University chapter of OSPIRG will be expanded to a regional office, Kirk said.
