Teacher Continued from Page 3

The student teaching program is too open-ended, Lobue says. "I think the obligation is not as long as it should be. It would be more beneficial if it was longer because now I only see one portion of it."

There are lots of transitions in a school year, Lobue says, and "one term doesn't give you the whole picture, a clear picture of what the school year is like."

Larry Smith, one of about 20 supervisors who evaluate the work of student teachers, has nominated Lobue for the Bryce Award, given annually to the most outstanding student teacher.

University students who wish to be student teachers must first obtain the endorsement of their department. The endorsement states that the student has completed enough hours of study in his or her field to be eligible to teach in that field.

After receiving the endorsement, students must apply for entrance to the education department. Students must have an acceptable grade point average and must have passed the California Basic Education Standards Test before they are accepted to the department. Once accepted, they enter "block one" of the program, Smith says.

Block one is an introduction to teaching, he says, with students taking courses to learn such things as teaching strategy.

Once block one is completed, students go on to block two, which consists of completing a one-term practicum, Smith says. The student is assigned to

a school and works with a teacher to get a feel of the classroom operation, he says.

Although most student teachers are seniors, Smith recommends that students begin the application process while they're juniors.

Once placed at a school, the student teacher is assigned to a "cooperating" teacher who monitors his or her performance in class. If the student teacher does exceptionally well, he or she may be allowed to teach the class on their own, free from the watchful gaze of the cooperating teacher.

Amato has supervised 15 to 20 student teachers over the past 20 years and tries to promote the best possible experience for kids and student teachers, he says.

"Student teaching gives you a mind-set about whether you will enjoy the profession or not," he says. "If you have a difficult teaching experience, you may not want to go into the profession."

"It's kind of a test market," Amato says. "Unfortunately, it comes rather late in your education. You should really think about getting experience as early as possible. Through ESCAPE, for instance."
