

We knew you'd be back.

We knew you couldn't stay away. That you spent all summer thinking about organic chemistry and Kafka.

That's why we're stocked up with a full selection of all members of the Apple® Macintosh personal computer family.

Because whatever you're going to be doing in school this year, there's a Macintosh that can help you do it better.

From the Macintosh Plus to the Macintosh SE and the Macintosh II, students everywhere have learned that working smarter and doing better in school can be as easy as pointing and clicking.
