Should Robert Bork be a supreme court justice?

'My views are a lot more liberal than his; however, he does seem to want to uphold the law. Those are his main objectives, and he is very intellectual and he knows what he's doing. I don't agree with him a lot but I wouldn't mind him being a supreme court justice.'

— Ian Camp, sophomore, pre-journalism

'His views on privacy and abortion are too closed minded. I think the things we are looking for in a supreme court justice is open-mindedness to every issue... He and his views are not what we need in the supreme court.'

— Michael Cross, freshman, undeclared

'I think he is too conservertive, too extreme, and his ideas are old. He just doesn't know what's going on today, and I don't think he should be in there.'

— Danielle Ackerman, freshman, undeclared

'I think he should become a supreme court justice. Personally I think he has a command of the constitution, he goes by the law as it is explicitly explained and he doesn't let society influence him, as in the case of abortion. He goes by the strict sense of the law and not by emotional factors.'

— Rod King, graduate student, human performance

Correction

The Emerald in its Oct. 2 edition incorrectly reported that Campus Security arrested an individual in a shoplifting incident Sept. 28 at the University Bookstore. It was in fact the University Bookstore security that made the arrest.

The Sept. 22 fourth-degree assault reported in the Pioneer Cemetery involved two victims, not one as reported. The Emerald regrets any inconvenience or confusion this may have caused as a result.

*Buy a box of Sony disks, get a free pair of sunglasses.**

"No, I've never lost a term paper because of disk error. But then, I've always used Sony."

When it's three o'clock in the morning and you're nearly done with your term paper, the last thing you want to see on the screen is "fatal disk error."

That's why so many people insist on Sony. One reason is that Sony invented the 3.5" disk drive as well as the 3.5" floppy diskette. Another reason Sony floppies are so popular on campus is their relentless

reliability. And that goes for our 5.25" floppies, too. After all, when it comes to magnetic media, nobody's ahead of Sony. We're a world leader in

audio, video and computer magnetic media. The thing to remember about magnetic media in computers is that almost any input error can be corrected, but lost data is forever. So, instead of learning your lesson the hard way, trust the diskettes that set the standard for the others to follow. Use the Sony.

SONY.
THE ONE AND ONLY.
