

27 WAYS TO MAKE A DIFFERENCE ON CAMPUS

By serving on any one of the 27 different student faculty committees, you can have a voice in critical decisions which effect the University. We currently have openings on many student faculty committees.

Academic Requirements	Museum of Art Advisory
Academic Advising	New Student Orientation
Advising	ROTC Advisory
Campus Planning	Safety Advisory
Curriculum	Scholarships
Equal Employment	Status of Women
Opportunity	Student Conduct
Ethnic Studies	Committee on Grievances
Faculty Personnel	Student Health Services
Foreign Studies Program	Teacher Education
Graduate Council	Traffic Appeals Board
Intercollegiate Athletics	University Appeals Board
Library	
Minority Education Council	

If any of these committees interest you, please pick up an application in Suite 4, EMU. Deadline for applications is Oct. 16.

Recycle This Paper

Now that you've gotten into Oregon, IBM can help you get more out of it.

The road to graduation is paved with term papers, lab reports, cramming, all-nighters and, of course, exams.

To ease that journey and awaken your professors to your exceptional abilities, we suggest the newest member of the IBM Personal System/2 family: the Model 25 Collegiate.

It's a high-powered personal computer with advanced graphics capabilities, designed to fit on your desk without adding to the clutter. And it comes with a generous 640 KB memory, two 3.5" diskette drives and an aid package every student can appreciate—a big

discount, plus Microsoft Windows 1.01, Write, Paint, Cardfile, IBM DOS 3.3 and a mouse.

Pop in the load-and-go diskette and your Model 25 Collegiate is set to help you write and revise long papers and illustrate your points by combining words and graphics. So your professors will draw favorable conclusions about your work.

For more information on the Model 25 Collegiate, visit the IBM Education Product Coordinator on campus. You'll quickly learn how to get the most out of the IBM Personal System/2. **IBM**

Excavation nets Indian artifacts

By Ingrid Petersen
Emerald Reporter

More than 2,500 years ago present-day Lakeview, Ore. was the hunting ground for Indians native to the North American continent, a recent University archeological excavation revealed.

The excavation, which was

done in conjunction with the Oregon State Highway Division, produced a piece of a stone bowl, used for processing plant foods, and hundreds of obsidian pieces, some of which were used for manufacturing hunting tools such as spears and arrowheads.

Based on the projectile points of the spears and arrowheads, the artifacts date within the last

3,000 years, said Bob Musil, a graduate student in anthropology who served as field director for the excavation.

However, University anthropologists still are in the process of determining the approximate date of the artifacts, Musil said.

It is thought that Indians from the Klamath Falls and Northern Great Basin regions were using this area for hunting and as an obsidian source, the material from which tools were made, Musil said.

The University's Museum of Anthropology is under contract with the Oregon State highway division to study and determine the anthropological significance of land on which the highway division wants to work, Thomas J. Connolly, Highway Division archeologist, said.

The division intends to widen State Highway 140, which resulted in this particular excavation last September, Connolly said.

Participating in an archeological dig gives you another point of view, said Margaret Denouden, a senior anthropology major who worked on the excavation. "You really don't understand it until you do it yourself," she explained.

The museum and highway division also recently finished an excavation near Burns, Ore. last summer, which revealed that Piute Indians regularly used the area to gather roots.

"We found some evidence from that sight that there was root-gathering from some 500 years ago and that there was occupation 2,500 years ago," Connolly said.

In addition, two sights near State Highway 126 were excavated last year, yielding finds that resulted in a radio carbon date of 9,000 years ago, which is the oldest in the Willamette Valley, according to Connolly.

UO Bookstore

Faculty Board Member Needed at UO Bookstore

The U of O Bookstore is searching for a faculty member to serve on the Bookstore Board of Directors. The position of Faculty-at-Large is open to any full-time professor, associate professor, assistant professor, instructor employed as an officer of instruction, or officer of administration on the Eugene campus. This is a one year term, ending in June 1988.

U of O Bookstore board members represent the student, faculty and staff of the University of Oregon, and have the opportunity to guide the Bookstore in policy matters. Members attend monthly meetings, and receive a \$20 stipend per month.

Applications for the Faculty-at-Large position on the U of O Bookstore Board of Directors will be taken until closing, Monday October 19th. Please pick up your application packet in the Administrative Office at the U of O Bookstore.

For more information, please contact UO Bookstore General Manager, Jim Williams at 686-4331.
