Heads return to international style

Talking Heads  
Naked

The one thing that always stays the same about Talking Heads is that the band always is changing. Starting out as a spare New Wave quartet, they then cut a few albums grounded

on African polyrhythms. Their latest records were pop with country and folk tinges.

"Naked" marks a return to musical internationalism, with

the band traveling to Paris to work with musicians who, according to the liner notes, play "jazz, Rai, Zouk, highlife, tangos, sambas and weird branches of rap."

Never heard of Rai? Me either, but how many of us had heard of "township jive" before "Graceland"?

The new sounds are mainly interesting uses of percussion and horn charts that sound at once new and close to traditional "American" styles.

The lyrics are vintage David Byrne. His use of childlike

naivete is closer to the warmth of "Little Creatures" than to the seemingly mocking tone often present on "True Stories." But a handful of tracks also offer some adult insights and some truly funny lines.

"Naked" merely demonstrates that Talking Heads has an ear for melody and rhythm, intelligence for lyrics and the good sense to gather all this into a package that isn't pandering or parochial. All these are hallmarks of the great music of the '80s, with which "Naked" no doubt belongs.
