

Streetwise

What do you think about the EMU's decision to discontinue the use of Styrofoam?

'Everyone is phasing it out, it's being outlawed. It is crucial to get rid of it. Waste is getting out of hand. They should develop bio-degradable plastics that you could put into a concentrate or something.'

— Tony Nemeth, junior, sociology

'I'm glad that Dennis Carr is not afraid to be branded a liberal. Come up front and be forward and honest. On a world-wide scale every little bit helps.'

— Nancy Parker, EMU Staff (University alumna)

'I think it's great I heard they were going to talk to local businesses about doing the same. It's not organic material it sits around for billions of years. We act as a precedent go out and talk to others.'

— Amy Chenoweth, junior, Spanish

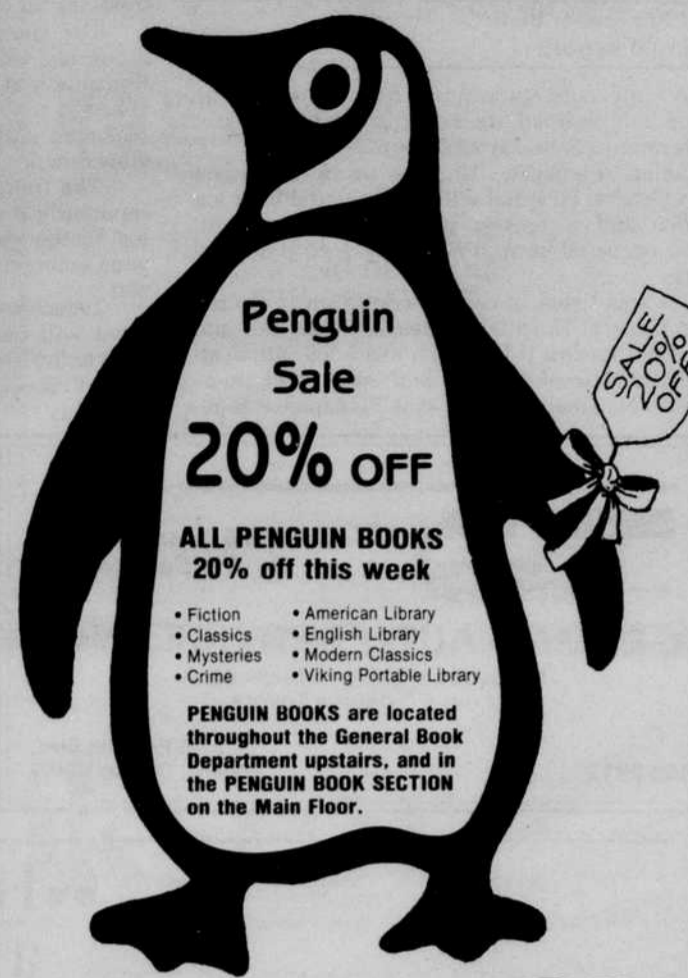

'I'm not too sure about the environment but I am sure about cleaning dishes and how much easier it would be. In the country I'm from we just started using it three or four years ago, and it saves time.'

— Kim Khaue, junior, business

NAVY ENGINEERING
AN INVESTMENT IN YOUR FUTURE

Benefits as a student

- earn \$13,800/yr for up to 24 months
- additional \$4000.00 bonus paid when you enter program
- NO drills, uniforms or summer obligations
- 100% medical and dental coverage
- outstanding, low cost travel opportunities to Europe, Japan and elsewhere for \$10.00
- early job security
- no worry about college expenses

Training after college

- 16 week Officer Candidate School and commissioning as a Naval Officer
- 6 months of graduate level engineering education in Orlando, Florida
- 6 months of hands on engineering training at a prototype trainer in ID, NY, or CT.
- 13 weeks of education in personnel and materials management, engineering systems and more

The Naval Engineer

- starting pay of up to \$27,000 with increases to over \$55,000 after five years
- works with space age technology and highly trained technicians
- opportunity for world travel
- continued professional growth and an opportunity for Navy paid graduate school
- retirement at 42 vice 62 for a 22 year old graduate
- outstanding marketability

Engineering, math, physics and chemistry majors with at least a 3.0 GPA, 3.3 and above preferred, and having completed one year of calculus and one year of calculus based physics are eligible. You need only submit a copy of your transcripts to determine your initial eligibility. Qualifying students will then be offered a **cost-free, no obligation** tour of a naval base at Bangor, WA or San Diego, CA, including a tour of a nuclear powered submarine and/or surface ship. We are convinced this is **THE BEST PROFESSIONAL ENGINEERING OPPORTUNITY AVAILABLE TO A COLLEGE STUDENT TODAY.**

Navy Engineering representatives will be in the Career Planning and Placement Center from **10:30 AM - 2 PM on 25 October 1988.** Call the Placement Center to schedule a time to ask your questions and receive free information about this program, or call us at 1-800-543-7287 for immediate information.

Resumes, brochures, business cards,
stationery . . . we do it all.
