Here's proof that there's more than one way to make a delicious taco.

On the inside, our Soft Flour Taco is full of the things you love in our traditional tacos, with seasoned lean ground beef, natural cheddar cheese, fresh shredded lettuce, and tasty tomato slices.

But the outside is a warm and wholesome soft flour tortilla.

With less than 400 calories, and with a variety of important nutrients, it's something special.

Students offered chance to study in Micronesia

By Christopher Blair
Emerald Reporter

Fifteen University students will have the opportunity to study firsthand the culture, politics and daily life of people in the islands of Micronesia in the Pacific Ocean.

Thanks to a \$64,000 Fulbright-Hays Group Project grant from the U.S. Department of Education, the students will study at the College of Micronesia on the island of Ponape the summer of 1990 from the end of June to Aug. 1.

The grant pays for the students' air fare and daily living expenses. A meeting for interested students will take place Wednesday, May 24 at 12:30 p.m. in the EMU Maple Room. The application and screening process discussed at the meeting.

Upper-division students from all fields are welcome to attend the meeting and apply for the summer Micronesia program.

The classes, such as economics, culture, and politics of small Pacific islands, will be culturally oriented, Gale said.

Saturday field trips to some of Micronesia's islands will enable students to study the people and cultures of high and low volcanic islands, in addition to coral atolls. Students will take courses from Micronesian professors.

"They will have a unique opportunity to experience a very different lifestyle," Gale said. "This is a program for anyone who is interested in anything international."

Gale added that, although the islands have several languages and dialects, English is the language spoken there.

Students will be able to earn 10 credits while studying on the islands. Extra readings will be available to students who need 12 credits to meet financial aid requirements.

Credits earned are applicable to University study, but Gale said it is up to students to consult with their departments if the credits earned in Micronesia can be applied to their major.

The grant is part of a larger program Gale has been working on since last year to bring Micronesian students and faculty to the U.S., and to send University students and faculty to the islands.

The opportunity to study in Micronesia will continue; however, Gale said this is the only time it will be paid for.

Micronesia was a trust territory of the United States from the end of World War II until 1986. The islands then became two independent nations, the Federated States of Micronesia and the Republic of the Marshall Islands.

Though independent, the nations are "freely associated" with the United States, which is responsible for the islands' defense. There are more than 600 islands covering 2½ million square miles of ocean.
