Perms — Are they in or out this season? You bet they're in!!

Volume, texture, fullness — lots of style and softness can be created by changing the shape of the hair (chemically). If you're worried about bad results, what's the solution? Maybe your hair is not in the best condition for a perm. There has to be something in the hair for the perm to lock into or you may be using a product line that leaves a build up on your hair that the perm just can't get through (this plastic coating is one of the most common problems) or maybe you need a fresh new technical approach.

Find a friend with a fantastic perm and ask — who did it?
