

Career Opportunities In The Northwest

Wang Laboratories, Inc., a major vendor in the computer industry, with over \$3 billion in sales annually, is looking for motivated individuals to join its Associate Marketing Representative Sales Training Program.

Since you will probably want to stay in the Northwest, these training opportunities are located in Seattle, Portland and Boise.

This is a 12-month training program that includes both formal classroom training on product knowledge and selling techniques as well as actual on-the-job training through the guidance of a mentor.

This provides a smooth transition from college to the working world as evidenced by the program's 90% success rate after the training is completed. The compensation package includes one of the best benefits packages in the industry, and a \$26,000 first-year salary.

If you are a recent graduate or are planning to graduate this spring, please visit your Placement Center within the next week to inquire about getting on our interviewing schedule. WANG will be on campus Wednesday, February 28, 1990. We are an Equal Opportunity Employer.

WANG

People make it work.

I

t's like getting paid to go to school.

Backpacks and frisbees abound. Challenge is in the air. Heated debates erupt from passionate beliefs.

Surprise! It's Microsoft. The premier software corporation in the world has more the feel of a college than a multinational corporation. Intellectual energy. Eclectic decor and dress. All on a modern, wooded campus in the Eastern hills above Seattle.

Microsoft is better than college, however. You get your own room — a private office with a door. You have access to the latest microcomputer technology, as well as the brains that helped create it.

So now you don't have to give up the fun and excitement of college in order to make it in the "real world". All you have to do is join Microsoft.

Software Testers

Work as a team with our software developers to release first-class products. Identify strengths and weaknesses in future software and take responsibility for making the necessary changes. As a Systems Tester you will design how the systems should be implemented, as you learn the internals of our systems products and develop applications to test the software at the API level. As an Applications Tester you will design, execute, and document tests of applications software to validate product requirements and design.

If you'd like to impact the agenda for the future of Microsoft products, bring your impressive technical skills and unique ability to make things happen to Microsoft.

Ready for some real fun?

Microsoft will be interviewing on campus:

February 14, 1990
