to face next year, Stickel said.

"That would be an issue where Kirk's and my purpose, if we are elected, would be to represent the students and advocate for the students," Stickel said.

"There's a lot of things students need to be concerned about," Bailey said, noting that his and Stickel's concern about the issues prompted them to enter the executive race. "There hasn't been much response in terms of people getting involved in the electoral process and that's kind of dismayed me. We need to get some active, strong people in there."

Part of the Bailey/Stickel ticket's strength is their ability to work as a team, Stickel said.

"It really is more of a team concept," she said. "Neither one of us really rises above the other. It was very difficult for us to make the decision."

"When and if we get elected, we plan to run it in an egalitarian type fashion and really balance each other out," Stickel added.

In addition, Bailey and Stickel already are familiar with the workings of the ASUO office and they "don't have to learn the ropes" of how the system operates, Bailey said.

"Sheila and I are very oriented toward getting something done, keeping things moving, (and) our experience is going to let us not have to learn those ropes," he added. "We're going to hit the ground running."

Commission Continued from Page 1

Henton, who is program manager for SRI's economic competitiveness center, said the answer is to strengthen post-secondary education on all three campuses.

"One of the themes were identifying here is the role the Portland Metropolitan area must play as a knowledge service center and resource for the rest of Oregon," Henton said.

Henton said he does not see the commission's work as being a zero sum game for other higher education institutions, where resources are reallocated to the Portland area.

"There's going to be sharing of responsibilities between universities depending on their specialty," he said.

The report outlined 10 areas where Portland's higher education institutions need to improve to establish the region as an "enterprising global community."

Moreover, the report compared the direction the Portland area is moving in to economic and cultural trends on international and national levels.

Henton said three key findings of the report include the Portland area's ability to be enterprising in economic expansion and in solving social problems.

Douglas Henton

"The final dimension, which is the most critical in many ways, is maintaining and preserving the quality urban environment that makes Portland so unique," Henton said.

Post-secondary education is critical to achieving the visions that are laid out in the report, he said.

On July 14, 1960, Jane Goodall, a 26-year-old woman from Bournemouth, England stepped from a government launch onto the sandy shore of Lake Tanganyika. She had been sent by the famed anthropologist/paleontologist, Dr. Louis S. B. Leakey, to begin a long-term study of chimpanzees in the wild. Jane's arrival at Gombe began the fulfillment of a twofold childhood dream: "to study animals in Africa and to write about them."

FRITJOF CAPRA

Saturday, March 10
7:30pm, Hult Center

Fritjof Capra, Ph.D., physicist, environmentalist, and futurist at UC Berkeley, presents a public lecture with extended Q&A.

In *The Tao of Physics*, he showed parallels between ancient mysticism and modern physics. In *The Turning Point* he combines a holistic approach, ecological and feminist perspectives, and global economic alternatives. In *Uncommon Wisdom*, he recalls conversations with remarkable people—from Heisenberg to Krishnamurti.

Also, Policy Forum, Sunday, March 11, 10 am, Hilton Hotel.

JANE GOODALL

Tuesday, April 10
7:30pm, Hult Center
