

Ever wonder why the kid who sits next to you is always absent?

If somebody you know drives a Nissan® Hardbody™ 4x4, you might as well disregard all their bogus reasons for not showing up to class. Because the real reasons are a whole lot more interesting.

For starters, there's an optional fuel-injected V6. Plus your choice of 5-speed manual or overdrive trans-

mission. Which gives you power to get wherever you want to go. And have a great time getting there.

And with its 1400-pound capacity, the Nissan Hardbody 4x4 can help you carry much more than a heavy course-load.

Stop in and test-drive a Hardbody at your nearby

Nissan Dealer. And see how much more fun you could be having in school. Especially during your most boring classes.

Built for the Human Race.

This advertisement is based on a concept submitted by Joseph Zukowski, Temple University. Optional equipment shown.
