

The 1400 lb. backpack.

Get a load of this.

The Nissan® Hardbody™ 4X2 has a payload of a whopping 1400 pounds. So when you want to head for the hills, you'll have more than enough room to take all your stuff. Hiking gear. Ski equipment. Or, just about anything you need to get out. And get away.

Of course, the Hardbody also has a roomy cab and a fuel-injected engine. And, with its 5-speed manual transmission, it can tow up to 3,500 pounds. Which gives you all the more reason to check out the Nissan Hardbody at your local Nissan Dealer.

You'll find it carries a lot of weight.

Built for the Human Race.®
