

DESCRIPTION: The Incidental Fee Committee (IFC) distributes more than \$4.5 million in incidental fees to over 75 ASUO programs on campus as well as two subsidies which are allocated to the EMU and Athletic Department (the two subsidies total approximately 2/3 of the overall budget). The Committee meets at various times throughout the year and has regular budget hearings beginning in January and ending in March or April. There will be four members of the IFC elected for 1-Year terms and 1 member elected for a 2-Year term. The current stipend is \$110 for 9 months.

KARI ANDERSON

If elected to the Incidental Fee Committee, I would serve as an unbiased student representative to allocate student fees in a manner which would insure the cultural and physical diversity this campus deserves and has enjoyed for many years.

As a member of AS-PAC I have been careful to equally represent the student body at large and would carry this philosophy over to my IFC seat. However as students at the University of Oregon we have seen significant increases in student fees over the last five years. I would work to keep these fees at the current level or below by assisting the various ASUO funded organizations to efficiently allocate our student fees.

JENNIFER BILLS

As a fee-paying student, I am committed to keeping fees as low as possible while still maintaining quality programs.

My experience, innovation and commitment enable me to meet this challenge. In the past, I have been both an uninvolved

student and a very involved program director. I am currently an active board member of the US Student Association, which allows me to bring ideas from other campuses to the UO.

As GALA co-director, I learned to formulate budgets, be accountable for student money, and solicit outside resources for the program. Many ASUO programs currently fundraise. While this work is excellent, I believe that student government needs to do their share of fundraising. I will work with other student leaders to force the University, local, state, and federal government to pay their share of many programs.

As students, you will benefit from my experience with a variety of students and student groups, and the broad understanding of issues I will bring to the fee allocation process. I am a fair and caring member of the UO community, and with your vote, I will make an outstanding contribution to the IFC.

ERNIE BROWN

"The Incidental Fee Committee is responsible for allocating more than 4.5 million dollars in student fees to more than 75 ASUO funded programs as well as the EMU budget and the Athletic Department subsidy. Great skill is needed for the management of these funds.

The process for the allocation of these funds must be done in such a way that the needs of the bulk of the student body are met. The allocations must be set up in such a way that everyone gets a fair share of the funds.

If elected to the Incidental Fee Committee, I will make sure that this process is set in motion and that students will have a say in where their money is going. I have the experience of working within the system and know where the problems are. I am knowledgeable,

experienced, and know what must be done. Vote for Ernie Brown".

BARCLAY LLOYD GRAYSON

An Incidental Fee Committee member should not enter into the responsibilities of such an important and powerful position carrying any type of political or personal baggage. An Incidental Fee Committee member should base their fee allocating decisions on criteria set in advance by the committee, and not on hidden political agenda's. An Incidental Fee Committee member should also have experience with budgeting and finance, and with tough, progress oriented decisions. I have these qualifications.

My experience as a securities broker has given me extensive experience in "real world" business decisions. In the last three years I have personally traded over \$28 million dollars in investment securities. I have also worked as a financial analyst and written a computer program meant to analyze a firm's financial positions. My relevant "on-campus" experience includes serving as Inter Fraternity Council Treasurer, Beta Theta Pi Treasurer, Corresponding Secretary, and Recording Secretary, as well as handling all accounts for the "Greeks for Kathy Guard" Philanthropy.

But most importantly I have the ability to deal with each student group on a one-to-one basis; though my experience with numbers is extensive, at heart I am a "person-person".

TIMOTHY GROSSNICK-LAUS

"The Incidental Fee Committee is responsible for the allocation of in excess of Four million dollars to about 75 ASUO funded groups or subsidised programs. We as students all pay an incidental fee. It is extremely im-

portant that these funds are allotted fairly in a manner that reflects the general views and interests of the student body. While it is important to take into account the special funding needs of certain groups, the committee must not allow groups which represent a vocal minority to have unproportionate funding.

In order to accomplish this I propose that a more clearly defined set of criteria be established to assess the needs of the various groups. This proposal would take into account the changing needs of the student body instead of being based primarily on previous years spending.

If elected to the Incidental Fee committee, I will work hard to insure that your incidental fees are distributed as fairly as possible and reflect the needs and interest of the student body. I also will not support any deficit spending. A vote for me is a vote for fair distribution of your incidental fees."

JOSONJA WATSON

All students of the University of Oregon each term contribute \$92 per term of their tuition towards incidental fees, a total amount well over 4.4 million dollars. This money is distributed to the EMU and its subsidiary groups, the Athletic Department, and about 75 ASUO funded programs. The two programs that received the most money (approximately 1.2 million each) are the EMU and the Athletic Department. With a lot of time, effort, and serious thinking composed of analyzing each program to its fullest and getting rid of unnecessary cost, the IFC committee could allocate this money to more needy pro-
