"You're in luck! This place just came on the market a few days ago. ... The previous owners all had their heads chopped off."

I would've bought a Macintosh even without the student discount.

Greg Gallent
Consumer Economics and Housing
Cornell University

"The first time I saw a Macintosh, I was immediately hooked. It's a work of art. I saw the student pricing and my next move was obvious: get one.

"Some other computers are cheaper, but they're a pain to learn, and working on them can be a grueling experience. Last year, a friend bought another kind of computer against my advice and has used it for maybe 15 hours. What a waste.

"Macintosh, on the other hand, is a logical extension of the mind. It lets you concentrate on what's *in* your paper, not on how to get it *on* paper. You can create professional-looking documents in minutes, and you lose the fear of learning new programs because they all work in the same way.

"Once you've worked with a Macintosh, there's no turning back."
