The Macintosh.

The monitor.

The money.

Save now on select color Macintosh systems.

Buy Apple's new Macintosh[®] IIsi and an AppleColor[™] High-Resolution RGB Monitor now through January 5, 1991, and save.*

The Macintosh IIsi is Apple's latest powerful, affordable system. It's built for people who want performance and need affordability. At 20 megahertz, it can even do serious number crunching at an impressive speed. And like all Macintosh computers, it's easy to set up and easy to use. So you can spend less time learning and more time doing.

What's more, you can save not only on the new Macintosh IIsi, but also on the Macintosh IIfx or the maximum-performance Macintosh IIfx. Just combine any of these exceptional computers with an AppleColor High-Resolution RGB Monitor, and you'll be getting a system of lasting value. Not to mention great savings.

Hurry in today for a closer look at the new Macintosh IIsi system and the other Macintosh II systems. Then choose your Macintosh, your monitor, and see how much money you'll save when you buy now.
