

Macintosh

Visions of Christmas and 364 other days of the year.

If you have visions of a Mac beneath your Christmas tree,
here's a crash course in parental persuasion.

The Intellectual Angle.

Tell your folks Mac comes highly recommended by the nation's top universities. Outline its academic advantages. Show them what last term's work could have looked liked.

The Practical Pitch.

Wow them with the bottom line. Reveal the special price available to eligible students on your campus. Stress affordability with extra savings on select Mac II color systems this season.

The Emotional Plea.

Plant your parents in front of the nearest Mac and come unglued as it does its stuff. Exclaim wildly over its dazzling graphics, musical genius and technical magnificence. Then promise to share.

Special pricing available only to eligible students,
faculty and staff of the University of Oregon.
